**KATA ALUAN DEKAN
DEAN'S MESSAGE**

Dengan rasa bangga dan besar hati saya ingin mengalu-alukan kedatangan semua pelajar baharu bagi sesi Tahun Akademik 2020/2021. Tahniah dan terima kasih kerana memilih Fakulti Pendidikan, Universiti Malaya sebagai pilihan utama untuk melanjutkan pelajaran. Fakulti yang terulung ini bukan sahaja telah mencipta nama di peringkat nasional bahkan juga di peringkat antarabangsa.

It is my pleasure and honour to welcome all new students to the 2020/2021 Academic Year. Congratulations and thank you for making the Faculty of Education, University of Malaya your preferred choice. This established Faculty has made its mark not only nationally but also internationally.

Seiring dengan pencapaian Universiti Malaya, Fakulti Pendidikan juga telah berjaya meningkatkan tarafnya dengan tersenarai sebagai salah satu daripada 100 Fakulti Pendidikan terbaik di dunia. Pencapaian ini tidak tiba dalam sekelip mata tetapi adalah berasaskan daya usaha dan keprihatinan daripada setiap ahli fakulti serta para pelajar. Dengan usia hampir 60 tahun, Fakulti Pendidikan terus unggul dengan kejayaan menghasilkan kira-kira 20,000 graduan cemerlang. *In line with the achievements of the University of Malaya, the Faculty of Education has also been able to raise its standards to become one of the top 100 education faculties in the world. This success did not happen overnight but is based on years of toil by faculty members and students. Being almost 60 years of age, the faculty has continued to perform and has succeeded in producing more than 20 000 outstanding graduates.*

Program akademik yang ditawarkan oleh fakulti bukan hanya menyediakan pelajar dengan ilmu intelektual dan kemahiran semata-mata tetapi turut menghubungkan teori dan amalan bagi mempersiapkan pelajar untuk menempuh alam pekerjaan dalam dunia sebenar. Sehingga kini, graduan kami tidak hanya menyerlah dalam industri tempatan malah turut menyinar di persada antarabangsa.

Our academic programmes do not only provide students with knowledge and skills, but also develop them to link theory to practice for better preparation for real life situations in the workforce. To date, our graduates are successful locally and have shone internationally as well.

Dalam meraikan kejayaan ini, sesi akademik kali ini merupakan suatu sesi yang mencabar. Dunia dilanda pandemik Covid 19 dan kita terpaksa menyesuaikan diri dengan norma baharu. Keadaan ini secara langsung mempengaruhi cara pengajaran dan pembelajaran termasuk cara menjalankan penyelidikan. Anggaplah norma baharu ini suatu anjakan paradigma kearah pengajaran dan pembelajaran yang lebih efektif seialiran dengan kehendak semasa. Justeru, Fakulti Pendidikan sentiasa mengambil langkah-langkah sewajarnya dalam memastikan pengajian anda semua tidak terjejas dalam menghasilkan graduan yang berkualiti.

As much as we take pride in such success, we face a great challenge in this particular academic session. The world is currently facing the Covid 19 pandemic and there is a need to practice new normals. It has indirectly affected teaching, learning and research. Do perceive these new normals as a paradigm shift towards more effective teaching and learning in tandem with current trends. Thus, the Faculty understands that it needs to consider the latest challenges. Hence the Faculty will always take appropriate steps to ensure that your studies will not be disrupted in line with our aim of producing quality graduates.

Akhir kata, untuk memastikan kecemerlangan yang mapan, misi dan visi fakulti haruslah didukung ke arah hala tuju yang hendak dicapai. Perancangan disusun dengan teliti untuk generasi akan datang.

Lastly, to ensure sustained excellence, it is essential to uphold the University's and Faculty's missions and visions as we proceed with careful planning for future generations.

Salam hormat dan selamat maju jaya!
Regards and all the best for your success!

UNIVERSITI MALAYA
UNIVERSITY OF MALAYA

Universiti Malaya (UM) merupakan universiti pertama yang ditubuhkan di Persekutuan Tanah Melayu (Malaya) pada 8 Oktober 1949 dari gabungan King Edward VII College of Medicine (1905) dan Raffles College (1928). Penubuhannya menjadi pemacu kepada kemajuan pendidikan di Tanah Melayu pada ketika itu sehingga tertubuhnya dua cawangan autonomi yang terletak di Singapura dan Kuala Lumpur pada tahun 1956. Dalam usaha memperkukuhkan pendidikan tinggi di kedua-dua negeri, status universiti cawangan perlu dinaik taraf kepada universiti kebangsaan. Oleh itu, Akta Parlimen 1961 telah diluluskan dan secara rasminya Universiti Malaya di Kuala Lumpur telah diiktiraf serta mengangkat martabat kepada universiti kebangsaan pada 1 Januari 1962. Sejak itu, Malaysia (Gabungan dengan Singapura, Sabah dan Sarawak pada 1963) melalui pelbagai proses transformasi dalam dunia pendidikan. Selaras dengan ini Universiti Malaya terus melipat gandakan usahanya untuk menjadi sebuah institusi pengajian tinggi yang ternama di peringkat antarabangsa dalam penyelidikan, inovasi, penerbitan dan pengajaran.

The University of Malaya (UM) was the first university established in Malaya on 8th October 1949 with the merger of the King Edward VII College of Medicine (established in 1905) and the Raffles College (established in 1928). Its establishment accelerated the advancement of education in Malaya and led to the founding of two autonomous branches in Singapore and Kuala Lumpur in 1956. In order to enhance higher education in both countries, there was a need to upgrade the branches to national university status. Thus, with the passing of the Parliament Act in 1961, the University of Malaya, Kuala Lumpur was officially recognized as a national university on 1st January 1962. Since then, Malaysia (Joining of Singapore, Sabah and Sarawak in 1963) has undergone a myriad of educational transformations. In line with this, the University of Malaya has continually stepped up efforts of becoming an internationally renowned institution of higher learning in research, innovation, publication and teaching.

Bagi menjayakan wawasan murni ini, Universiti Malaya disokong oleh hospital penyelidikan terbesar dan pertama di Malaysia iaitu Pusat Perubatan Universiti Malaya (PPUM), dua akademi, dua belas fakulti, empat institut dan tiga pusat akademik yang bersifat menyeluruh merangkumi bidang perubatan, sains, teknologi serta sains sosial dan sains kemasyarakatan. Selain daripada itu, dalam usaha menyumbang kepada perkembangan ilmu, Universiti Malaya telah mewujudkan enam Kluster Penyelidikan. Penubuhan kluster ini menawarkan penyelesaian dan penemuan terbaharu dalam pelbagai bidang. Penekanan terhadap bidang penyelidikan diperkukuhkan dengan tertubuhnya pusat-pusat kecemerlangan di pelbagai pusat pengajian. Pada 11 Oktober 2006, Universiti Malaya telah diiktiraf oleh Jemaah Menteri sebagai salah satu dari lima universiti awam sebagai universiti penyelidikan. Pada 26 Januari 2012 pula, Universiti Malaya telah diberikan status autonomi oleh Kementerian Pengajian Tinggi (kini dikenali Kementerian Pendidikan Tinggi). Di atas kejayaan Universiti Malaya dalam pengurusan penyelidikan, proses audit Malaysian Research Assessment Instrument II (MyRA II), Kementerian Pendidikan Tinggi ke atas Universiti Penyelidikan telah meletakkan Universiti Malaya sebagai 'the Best Research University in Malaysia with the Highest Marks' pada 1 Disember 2013.

To achieve this vision, the University of Malaya is supported by the University of Malaya Medical Centre (UMMC), the biggest and the first research teaching hospital in Malaysia, two academies, twelve faculties, four institutes and three centers that comprehensively encompass medicine, science, technology, the social sciences and the humanities. In addition, six research clusters have also been established to place the University at the forefront of new knowledge and discoveries. Furthermore, the University of Malaya continues to place heavy emphasis on research through the establishment of centers of excellence. On 11th October 2006, the University of Malaya was recognized by the Ministers' Council as a research university among the five public universities. On 26th January 2012, the University of Malaya was granted autonomy status by the Ministry of Education (now known as the Ministry of Higher Education). The success of the University of Malaya in research management, was captured through the audit process based upon the Malaysian Research Assessment Instrument II (MyRA II) by the Ministry of Higher Education. The University of Malaya was found to be the 'Best Research University in Malaysia with the Highest Marks' on 1 December 2013.

Dengan menjadikan aspirasi nasional sebagai pegangan, Universiti Malaya terus memperkukuhkan kedudukannya dalam dunia akademik di peringkat nasional mahupun antarabangsa. UM berada pada kedudukan ke-114 di dunia bagi QS World University Ranking 2018 dan di tangga ke-27 bagi QS Asian University Rankings 2016. UM juga merupakan satu-satunya universiti di Malaysia yang tersenarai dalam kalangan 400 universiti terbaik dunia (Academic Ranking of World Universities) oleh Shanghai Jiao Tong, China. Pencapaian ini menobatkan Universiti Malaya sebagai universiti terbaik di Malaysia. Pada 6 Mei 2014, Universiti Malaya menerima pengiktirafan di peringkat antarabangsa sebagai satu-satunya institusi pengajian tinggi di Malaysia yang mendapat penarafan 5 bintang oleh QS Stars Ratings. Universiti Malaya juga telah diiktiraf sebagai Universiti Pilihan oleh Reader's Digest Trusted Brand selama 10 tahun berturut-turut sejak tahun 2007 hingga 2016. Dengan rekod tersebut, UM telah dianugerahkan Anugerah Platinum dalam Kategori Universiti Awam pada

27 Mei 2014. Pengajaran, penyelidikan, penerbitan, inovasi dan komersialisasi menjadi tunjang usaha Universiti Malaya menyumbang kepada dunia akademik dan masyarakat.

With the nation's aspirations as its guide, the University of Malaya continues to strengthen its status in the academic world, both within the country and internationally. It has been ranked 114th in the 2018 QS World University Ranking and 27th in the 2016 QS Asian University Ranking. The University of Malaya is also the only university in Malaysia listed in the top 500 Academic Ranking of World Universities by Shanghai Jiao Tong, China. These accomplishments have endorsed the University of Malaya as the best university in Malaysia. On 6th May 2014, another international recognition was achieved when the University of Malaya became the only institution of higher learning in the country to be awarded a 5 star rating by the QS Stars Ratings. The University of Malaya has also been named as a University of Choice by the Reader's Digest Trusted Brand for ten consecutive years from 2007 until 2016. With that record, the University of Malaya was awarded the Platinum Award for the Public University Category on 27 May 2014. The thrust of the university's contribution to academia as well as society is through teaching, research, publication, innovation and commercialization.

Seiring dengan universiti-universiti antarabangsa, Universiti Malaya menjalinkan usahasama dengan institut penyelidikan dan universiti terkemuka dari 71 buah negara. Di antara universiti terkemuka dunia yang menjalinkan kerjasama secara aktif dengan Universiti Malaya adalah:

In keeping the university on par with international universities, the University of Malaya has collaborated with renowned research institutes and universities from 71 countries. Some of its active global partners are:

University of Cambridge Harvard University Kyoto University University of Sydney Queen Mary, University of London, Queen's University,	Belfast Beijing Foreign Studies University Tsinghua University National University of Singapore National Taiwan University Yale University, University of Hyderabad

University of Malaya High Impact Research (UM HIR) telah ditubuhkan pada Februari 2010 dan telah diperuntukkan sejumlah RM10 juta dana dalaman UM bagi menggalakkan penyelidikan fundamental yang menasaskan penerbitan Tier 1 ISI/WoS. Menyedari kepentingan UM sebagai institusi penyelidikan terkemuka negara, Kementerian Pengajian Tinggi (KPT) telah meluluskan peruntukan berjumlah RM590 juta untuk Program UM-MoHE HIR bagi tempoh 5 tahun bermula Ogos 2011 sehingga Jun 2016.

Sehingga kini, UM telah melantik empat Felo Nobel dan dua Profesor Ulung sebagai ahli Majlis Penasihat HIR. Mereka terdiri daripada Felo Nobel Profesor Barry Marshall (Psikologi atau Perubatan), Felo Nobel Profesor Ryoji Noyori (Kimia), Felo Nobel Profesor David Baltimore (Psikologi atau Perubatan), Felo Nobel Sir Dr. Richard Roberts (Psikologi atau Perubatan), Profesor Ulung Rita Colwell (University of Maryland, USA) dan Profesor Ulung Wong Chi-Huey (Academia Sinica, Taiwan).

Another landmark was in February 2010 when the University established the 'University of Malaya High Impact Research (UM HIR)' and provided RM10 million from its internal funds to promote fundamental research which will lead to Tier 1 ISI/WoS publications. Recognizing the importance of UM as a premier research institution in the country, the Ministry of Higher Education (MoHE) allocated RM590 million for the UM-MOHE HIR programme for a period of 5 years from August 2011 until June 2016.

To date, UM has appointed four Nobel Fellows and two Distinguished Fellows as members of the UM HIR Advisory Council. They are Nobel Fellow Professor Barry Marshall (Physiology or Medicine), Nobel Fellow Professor Ryoji Noyori (Chemistry), Nobel Fellow Professor David Baltimore (Physiology or Medicine), Nobel Fellow Sir Richard Roberts (Physiology or Medicine), Distinguished Professor Rita Colwell (University of Maryland, USA) and Distinguished Professor Wong Chi-Huey (Academia Sinica, Taiwan).

Bagi memastikan kurikulum yang disediakan menepati kehendak serta keperluan nasional dan antarabangsa, Universiti Malaya telah berjaya memperolehi akreditasi daripada pelbagai institusi dan badan profesional antarabangsa. Antaranya Washington Accord, Institution of Chemical Engineers UK, Royal Institution of Chartered Surveyors (RICS), Association of Building Engineers, Royal Institute of British Architects (RIBA), The Association of Chartered Certified Accountants, The Chartered Institute of Management Accountants, Institute of Chartered Accountants England and Wales, Certified Practicing Accountants of Australia, SMBG-Eduniversal France, Royal College of Surgeons of England UK, Institute of Physics & Engineering in Medicine UK, Association of MBA, UK dan banyak lagi untuk memastikan kurikulum universiti memenuhi keperluan kebangsaan dan antarabangsa, dan ini menunjukkan program kita adalah relevan secara global.

Sebagai universiti ulung di negara ini, Universiti Malaya berikrar untuk menerajui bidang penyelidikan dan inovasi dan mencapai kedudukan di antara 50 universiti terbaik dunia menjelang 2020.

As the premier university in Malaysia, the University of Malaya is committed in leading the nation to greater heights in research and innovation and to become one of the top 50 universities in the world by 2020.

MAKLUMAT AM FAKULTI PENDIDIKAN FACULTY OF EDUCATION GENERAL INFO

Fakulti Pendidikan ditubuhkan pada 1963, dan pada awalnya dinamakan Sekolah Pendidikan Universiti Malaya. Sekolah Pendidikan Universiti Malaya dibentuk untuk menawarkan Diploma Pendidikan, satu program pasca ijazah, bagi siswazah yang memilih profesion perguruan. Sekolah Pendidikan berkembang dengan amat pesat dan dinaikkan taraf kepada status fakulti pada bulan Julai 1965. Program Sarjana Pendidikan telah ditawarkan untuk julung kalinya selepas dua tahun kemudian, diikuti dengan penawaran program Doktor Falsafah pada tahun 1969.

The Faculty of Education was founded in 1963, and was initially named the School of Education. The School of Education offered the postgraduate Diploma in Education to graduates who chose to enter the teaching profession. The school expanded rapidly and was upgraded to the status of faculty in July 1965. The Master of Education (M.Ed) programme was introduced for the first time two years later and this was followed by the Doctor of Philosophy (Ph.D) programme in 1969.

Sejak penubuhannya, Fakulti Pendidikan Universiti Malaya telah berjaya melahirkan hampir 20,000 siswazah, iaitu lebih daripada 15,000 pemegang Diploma Pendidikan, lebih daripada 2,282 graduan Sarjana, dan kira-kira 3,500 dengan ijazah dasar pendidikan.

Since its establishment, the Faculty of Education has successfully trained almost 20,000 graduates. From among them, more than 15,000 have graduated with the Diploma in Education, more than 2,282 with a Masters degree and about 3,500 with a Bachelor in Education degree.

Nilai-nilai Teras Universiti Malaya adalah:
Core Values of the University of Malaya are:

<p>Integriti <i>Integrity</i> Hormat <i>Respect</i> Kebebasan Akademik <i>Academic Freedom</i> Berfikiran Terbuka <i>Open-Mindedness</i> Kebertanggungjawaban <i>Accountability</i></p>	<p>Profesionalisme <i>Professionalism</i> Meritokrasi <i>Meritocracy</i> Semangat Kerja Berpasukan <i>Teamwork</i> Kreativiti <i>Creativity</i> Tanggungjawab Sosial <i>Social Responsibility</i></p>

Untuk mencapai wawasan ini, Fakulti telah mengenal pasti objektif yang berikut:
To achieve this mission, the Faculty has identified the following general objectives:

- Untuk menghasilkan guru yang cekap bagi sekolah dan institusi pendidikan lain.
To produce competent teachers for schools and other educational institutions.
- Untuk menghasilkan pakar dalam semua bidang pendidikan dan pembangunan manusia.
To produce experts in all areas of education and human development.
- Menjadi pusat pengajian pasca ijazah dan pembangunan manusia.
To become a postgraduate centre in education and human development.
- Menjadi pusat inovasi, penyelidikan asas dan aplikasinya dalam semua bidang pendidikan dan pembangunan manusia.
To become a centre of innovation in basic and applied research in all areas of education and human development.
- Menjadi pusat latihan dan perundingan dalam bidang pendidikan dan pembelajaran untuk organisasi dan institusi.
To become the centre of training and consultation in the field of education for organizations and institutions

Fakulti Pendidikan menerima pakai peranan proaktif dalam usaha memenuhi era perubahan yang berterusan dalam bidang pendidikan. Ini termasuk penyemakan dan penelitan semula program dan kursus, penyemakan kurikulum dan instruksi untuk memasukkan, jika perlu, perubahan-perubahan yang berlaku dalam bidang pendidikan.

The Faculty is proactive in keeping pace with the ever-changing demands in the field of education. This includes the reappraisal of programmes and courses, curriculum revisions and departmental restructuring to accommodate new changes when necessary.

Pada tahun 1970, pada dasarnya, struktur Fakulti Pendidikan adalah terdiri daripada lima bahagian yang berbeza. Bagaimanapun, oleh sebab perkembangan baru dan anjakan paradigma dalam sistem pendidikan, Fakulti Pendidikan telah melalui satu siri penstrukturan dan pembentukan semula organisasinya bagi membolehkan Fakulti ini memenuhi hasrat visi dan objektifnya. Pembentukan struktur organisasi terbaru Fakulti Pendidikan telah dilaksanakan pada tahun 2001 apabila jabatan-jabatan yang berikut ditubuhkan.

In 1970, the structure of the Faculty comprised five divisions. However, because of new developments and paradigm shifts in the educational system, the Faculty had a series of restructuring and reorganisation exercises to enable the Faculty to realise its vision and objectives. The latest organisational restructuring was carried out in 2001 resulting in the formation of the following departments.

- Jabatan Asas Pendidikan dan Kemanusiaan
Department of Educational Foundations and Humanities
- Jabatan Psikologi Pendidikan dan Kaunseling
Department of Educational Psychology and Counselling
- Jabatan Pengurusan, Perancangan dan Dasar Pendidikan
Department of Educational Management, Planning and Policy
- Jabatan Pendidikan Bahasa dan Literasi
Department of Language and Literacy Education
- Jabatan Pendidikan Matematik dan Sains
Department of Mathematics and Science Education
- Jabatan Kurikulum dan Teknologi Pengajaran
Department of Curriculum and Instructional Technology
- Institut Kepimpinan Pendidikan
Institute of Educational Leadership

Di samping menawarkan kursus-kursus peringkat ijazah tinggi, sejak permulaan penubuhannya, Fakulti Pendidikan terlibat dalam beberapa program ijazah dasar. Salah satu daripada program ini ialah program Ijazah Sarjana Muda Sains dengan Pendidikan. Program ini dimulakan bersama dengan Fakulti Sains Universiti Malaya pada tahun 1975 bagi memenuhi permintaan yang tinggi untuk guru-guru sains dan matematik bagi peringkat sekolah menengah atas. Selain itu, program ijazah Sarjana Muda Pendidikan Islam juga telah diperkenalkan pada tahun 1982. Kursus ini ditawarkan dengan kerjasama Akademi Pengajian Islam Universiti Malaya bagi menyediakan guru-guru untuk mengajar mata pelajaran Pendidikan Islam di sekolah-sekolah menengah.

Besides offering courses at the postgraduate level since its inception, the Faculty also conducts undergraduate programmes. Among these programmes is the Bachelor of Science with Education (B.Sc.Ed.). The programme was initiated jointly with the Faculty of Science in 1975, to meet the great demand for science and mathematics teachers at the upper secondary level. Another programme is the Bachelor of Islamic Education (B. Islamic Ed.) which was introduced in 1982. This course is conducted jointly with the Academy of Islamic Studies, University of Malaya, to prepare teachers to teach Islamic Studies in schools.

Pada tahun 1980, Fakulti Pendidikan mula menawarkan program ijazah dasarnya sendiri, iaitu Sarjana Muda Pendidikan Bahasa Inggeris Sebagai Bahasa Kedua (PBISBK). Program ini dilaksanakan dengan kerjasama Fakulti Bahasa dan Linguistik, dan Fakulti Sastera dan Sains Sosial. Satu program ijazah dasar dalam Pendidikan Awal Kanak-Kanak ditawarkan buat pertama kalinya pada tahun 1998 dan diikuti dengan satu lagi program ijazah dasar yang membawa kepada penganugerahan ijazah Sarjana Muda Kaunseling in 1997. Program Sarjana Muda Pendidikan (Pengajaran Bahasa Tamil) ditawarkan pada tahun 2000 dan pengambilan kumpulan pelajar terakhir bagi program tersebut ialah pada tahun 2004. Pada tahun 2004, Sarjana Muda Pendidikan (Pengajaran Bahasa Inggeris Sebagai Bahasa Kedua) Pendidikan Rendah telah ditawarkan.

In 1980, the Faculty started its own undergraduate programme the Bachelor of Education in the Teaching of English as a Second Language (B. Ed. TESL). The programme is being run in collaboration with the Faculty of Languages and Linguistics and the Faculty of Arts and Social Sciences. Other degree programmes offered by the Faculty include the Bachelor of Early Childhood Education which commenced in 1998 followed by the Bachelor of Counselling in 1997. An undergraduate program in Early Childhood Education was offered for the first time in 1998 and followed with another undergraduate program leading to the Bachelor of Counselling. Bachelor of Education (Teaching of Tamil Language) was offered in 2000 with the last intake for the programme being in 2004. In 2004, the Bachelor of Education (Teaching English as a Second Language) Primary Education was offered. Besides the above programmes, the Faculty is also involved in joint programmes with other faculties. Other programmes are the Bachelor of Education (Teaching of Tamil) conducted jointly with the Faculty of Arts and Social Sciences and the Bachelor of Language and Linguistics with Education (Chinese) conducted jointly with the Faculty of Languages and Linguistics.

Pada masa ini program sarjana muda yang ditawarkan di Fakulti Pendidikan adalah seperti berikut:
Currently the Faculty offers the following undergraduate programmes:

1. Sarjana Muda Pendidikan Pengajaran Bahasa Inggeris Sebagai Bahasa Kedua
Bachelor of Education Teaching English as a Second Language
2. Sarjana Muda Pendidikan Awal Kanak-Kanak
Bachelor of Early Childhood Education
3. Sarjana Muda Kaunseling
Bachelor of Counseling

Peranan Fakulti Pendidikan tidak terhad kepada pendidikan guru sahaja. Setiap ahli Fakulti mempunyai kepakaran tersendiri dalam bidang pendidikan, dan kebanyakan ahli akademik di Fakulti ini berkhidmat sebagai penasihat atau pakar runding kepada Kementerian Pendidikan Malaysia dan berbagai-bagai organisasi. Setengah-setengah daripada mereka bertugas rapat dengan agensi-agensi antarabangsa termasuk Bank Dunia, UNESCO, UNICEF, IBRD, RECSAM, dan RELC. Semua staf Fakulti ini terlibat secara aktif dalam penyelidikan, dan sejumlah besar kertas kerja dan artikel telah diterbitkan di kedua-dua peringkat, tempatan dan antarabangsa. Kebanyakan geran penyelidikan ditaja oleh Universiti Malaya atau agensi dalam dan luar negara.

The Faculty's role is not limited to teacher education. Each Faculty member has his/her own area of expertise in a particular field of education and many serve as advisers or consultants to the Ministry of Education and various organisations. Some members of the Faculty work closely with overseas and international agencies including the World Bank, UNESCO, UNICEF, IBRD, RESCAM and RELC. All academic staff members are actively involved in research and numerous papers and articles have been published in both local and international journals. Research by faculty members is largely sponsored by grants from the University or agencies from within and outside the country.

Fakulti Pendidikan telah memulakan usaha ke arah misinya untuk menjadikan Fakulti ini sebagai satu pusat pendidikan ijazah tinggi dalam bidang pendidikan yang membawa kepada penganugerahan ijazah sarjana dan doktor falsafah. Fakulti berhasrat untuk mengeluarkan pendidik berijazah tinggi bagi memenuhi permintaan sistem pendidikan yang dinamik. Dengan kekuatan semasa kakitangan akademik, yang hampir kepada 100 orang, berbanding dengan jumlah staf yang tidak seberapa, iaitu hanya lima orang, pada tahun 1963, tidaklah menghairankan bahawa Fakulti mempunyai sekumpulan pakar berbakat yang boleh memberikan sumbangan yang lebih besar kepada perkembangan dalam bidang pendidikan.

The Faculty of Education has embarked on a mission to enhance its role as a centre for higher degrees in education. The Faculty aims to produce more postgraduate educators to meet the demands of a dynamic education system. With the present academic staff strength of nearly 100 members compared to only five in 1963, the Faculty can proudly claim to have a pool of talented expertise with the ability to make greater contributions to development in the field of education.

Fakulti Pendidikan mempunyai jumlah terbesar pelajar ijazah tinggi untuk mengikuti pengajian ijazah sarjana dan doktor falsafah di Universiti Malaya. Di antara calon, yang terdiri daripada rakyat Malaysia, terdapat calon ijazah tinggi dari luar negara seperti Libya, Thailand, Brunei, Fiji, Sri Lanka, Cook Island, Samoa, China, Afrika, dan lain-lain. Dengan kehadiran pelajar dari luar negara, pendedahan dan latihan menjadi lebih luas apabila setiap pelajar dapat berkongsi pandangan dan pengalaman lepas.

The Faculty of Education has one of the largest number of postgraduate students pursuing either the Master or PhD degrees at the University of Malaya. While most of these graduate students are Malaysians, there are also postgraduate students who come from foreign countries like Indonesia, Iran, Iraq, Algeria, Libya, Thailand, Brunei, Fiji, Sri Lanka, the Cook Islands, Samoa, China and several African countries. With the presence of international students, the exposure and training received is enriching as students are able to share their diverse experiences and views.

Fakulti Pendidikan menawarkan pelbagai pilihan dalam bidang pengajian untuk ijazah Sarjana Pendidikan. Di antaranya ialah bidang yang ditawarkan Sarjana Pendidikan secara mod campuran:

The Faculty of Education offers many fields of study for the Master of Education degree. These include for master by mix mode program:

1. Perkembangan Kurikulum

Fakulti Pendidikan menawarkan program Doktor Falsafah Secara Penyelidikan dan juga secara Kursus dan Penyelidikan. Bagi Program Doktor Falsafah Secara Kursus dan Penyelidikan 3 bidang ditawarkan buat masa ini adalah;

The Doctor of Philosophy (PhD) programme is conducted either by research in 19 areas of study, or by coursework and research in three areas of specialisation namely:

1. Kurikulum dan Pengajaran
Curriculum and Instruction
2. Pengurusan dan Dasar Pendidikan
Educational Management and Policy
3. Kaunseling
Counseling

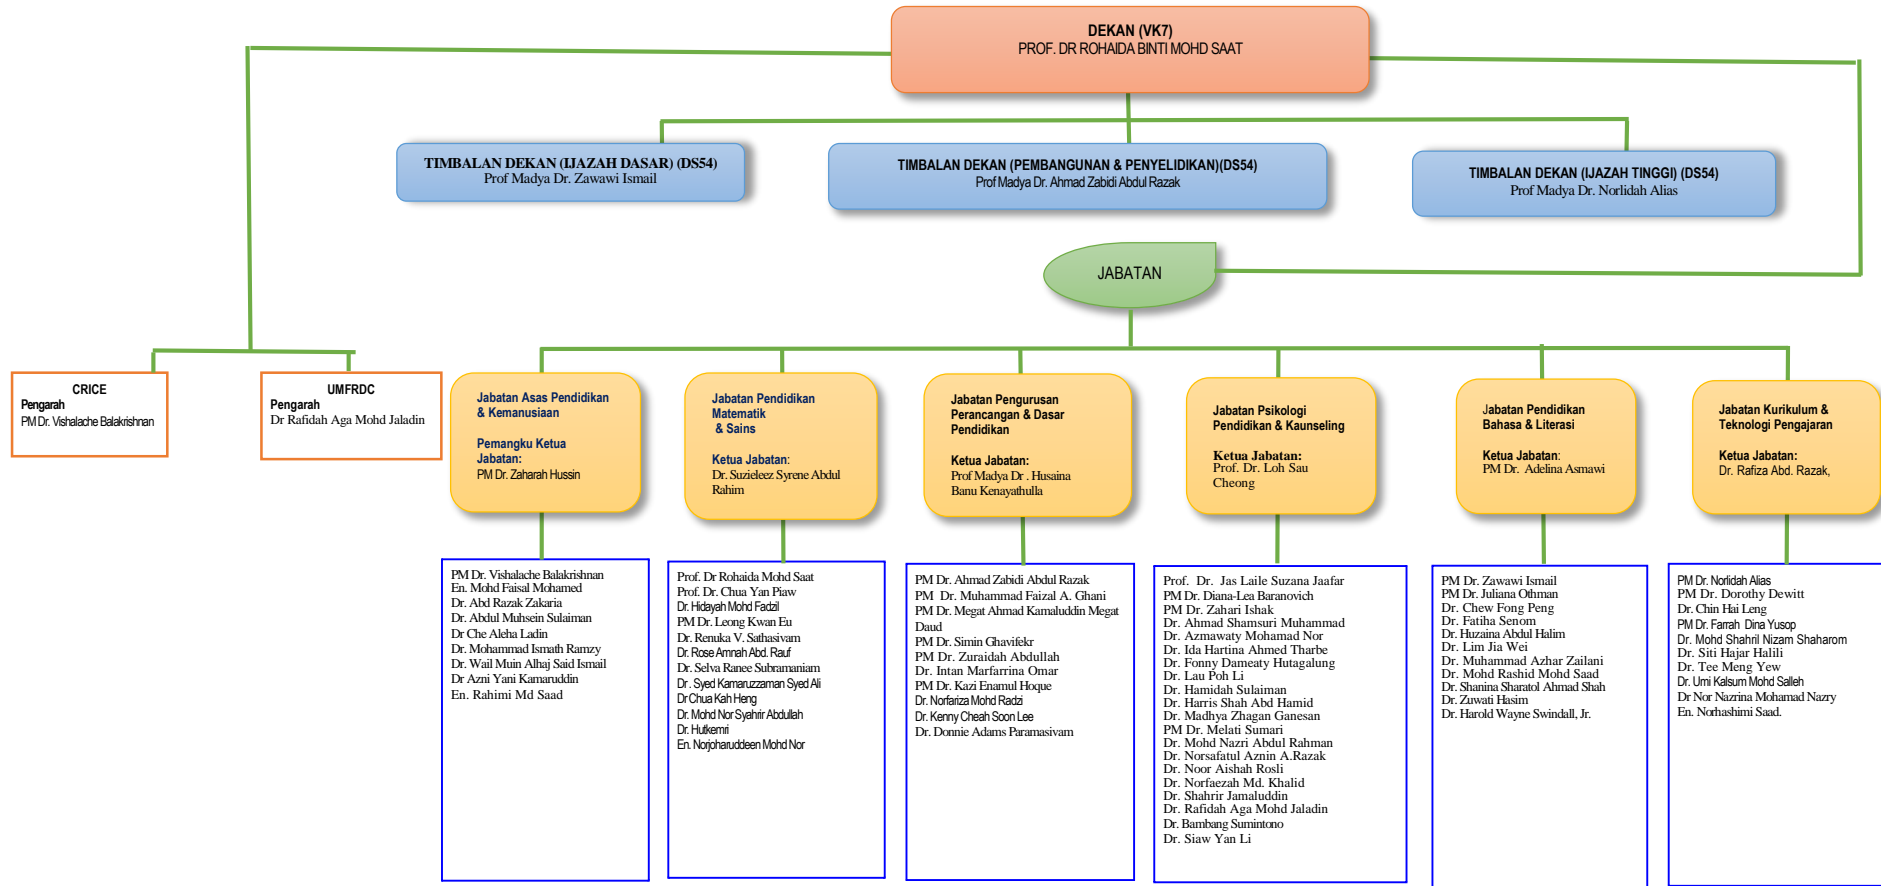

Walaupun pada asalnya bahasa pengantar pengajian kebanyakannya dilaksanakan melalui pengantar bahasa Melayu, namun semakin banyak kursus ditawarkan melalui pengantar bahasa Inggeris. Ini membolehkan para pelajar luar negara yang tidak fasih dalam bahasa Melayu dapat mengikuti pengajian ijazah tinggi melalui pengantar bahasa Inggeris di Fakulti ini. Secara praktikal, semua staf akademik Fakulti Pendidikan adalah tenaga akademik dwibahasa, iaitu mereka berkemampuan dalam kedua-dua bahasa Melayu dan Inggeris. Untuk pelajar dari luar negara yang tidak menguasai bahasa Melayu, Fakulti ini menyediakan, sebaik mungkin, tatacara pengajian khas, agar mereka dapat meneruskan pengajian kursus mereka dalam bahasa Inggeris.

Although the official medium of instruction for the Masters and PhD programmes is Malay, most of the courses are taught in English. This is to enable foreign students who are not proficient in the Malay language to pursue their postgraduate studies at the Faculty. In effect, all staff members are bilingual, that is, they are proficient in the Malay language as well as in English. For students from overseas who do not master the Malay language, the Faculty provides, as far as possible, special education procedures, so that they can continue their course of study in English.

SINOPSIS KURSUS / COURSE SYNOPSIS

PWA8001 Kaedah Penyelidikan Kuantitatif dalam Pendidikan (3 jam kredit)

PWA8001 Quantitative Research Approaches in Education (3 credit hours)

Pelajar akan mempelajari perkara-perkara penting dalam menggubal penyelidikan kuantitatif bagi membolehkan calon menyediakan suatu cadangan penyelidikan yang mantap. Tajuk yang akan dibincangkan dalam kursus ini termasuk pemilihan dan definisi sesuatu masalah, menyediakan dan menilai sesuatu rancangan penyelidikan; pemilihan sampel dan alat pengukuran yang bersesuaian, penerangan reka bentuk penyelidikan kuantitatif serta pertimbangan etika dan perundangan dalam menjalankan kajian. Kursus ini akan meninjau reka bentuk penyelidikan kuantitatif yang spesifik seperti kaedah tinjauan, kaedah kausal-komparatif, kaedah eksperimental, kaedah korelasi; dan seterusnya.

In this course, candidates will be exposed to advanced quantitative methods in educational research so they can demonstrate practical understanding of those techniques. The course will explore several methods and techniques in quantitative research such as sampling, data gathering techniques, design procedures, measurement and instrumentation, as well as ethical and legal considerations in conducting quantitative research. The course will also deal in-depth with research issues on validity and reliability, the survey method, experimental method, causal-comparative, correlational survey, and so forth.

PWA8005 Keadah Penyelidikan Kualitatif dalam Pendidikan (3 jam kredit)

PWA8005 Qualitative Research Approaches in Education (3 credit hours)

Kursus ini memperkenalkan kepada pelajar beberapa prinsip kaedah penyelidikan kualitatif. Ia akan meneliti secara mendalam beberapa isu berhubungkait dengan perbezaan antara pelbagai rekabentuk yang terdapat dalam kajian kualitatif seperti kajian kes, etnografi, fenomenologi dan lain-lain. Pelajar berpeluang untuk merangka pernyataan masalah, objektif dan soalan kajian, pemilihan sampel dan mengenalpasti pelbagai cara yang digunakan dalam pungutan data kualitatif seperti temubual, pemerhatian, analisis dokumen. Pelajar juga akan didedahkan dengan pelbagai isu yang berkaitan dengan kajian kualitatif seperti etika penyelidikan, kesahan dan kebolehpercayaan. Bagi membolehkan pelajar mendapat kemahiran secara praktikal, mereka dikehendaki menghasilkan satu cadangan penyelidikan yang menggunakan rekabentuk kajian kualitatif.

This course introduces students to the principles of qualitative research methods. It examines in depth issues relating to differences between various the qualitative research methods such as case study, ethnography, phenomenology etc. in terms of philosophical foundations, theoretical framework and data collection. Specific focus will be given on the training in question development, selection of sampling strategy, determination of data collection techniques such as interviewing, making observation, and document analysis, etc. Students will also be exposed to issues related to qualitative research methodology such as ethical issues, validity and reliability. Scholarly presentation and writing of qualitative research

proposal will also be reviewed.

Usually, every manuscript contains three main parts: the beginning, the text and references or bibliography. The arrangement of every part should be determined by the candidate on the advice of his or her supervisor. Further details on the format and content of each part can be found in the Guide to the Preparation of Thesis, Disertasi and Reserch Report, prepared by the Faculty of Education.

9. PANJANG PATAH PERKATAAN TESIS/ LENGTH OF THESIS

Panjang patah perkataan tesis perlu secara am berada dalam julat 80,000 - 100,000 patah perkataan. Jumlah maksimum panjang patah perkataan adalah tidak termasuk *footnotes*, rujukan, lampiran, jadual, rajah dan kata pengantar. Calon yang mahu melepasi had jumlah patah perkataan yang ditetapkan perlu memohon kepada Senat melalui Fakulti tersendiri sekurang-kurangnya tiga bulan sebelum tarikh penyerahan tesis untuk pemeriksaan dan memberikan sebab-sebab mengapa calon tidak boleh menetapi jumlah patah perkataan yang telah ditetapkan.

Length of thesis should generally be in the range 80,000 - 100,000 words. The maximum length of words excludes footnotes, references, appendices, tables, figures and prefaces. A candidate who wishes to exceed the number of words specified must apply to the Senate through the respective Faculty at least three months before the submission of the thesis for examination and provide reasons for the inability to adhere to the prescribed length.

SINOPSIS KURSUS / COURSE SYNOPSIS

PWX8001 Kaedah dan Falsafah Penyelidikan dalam Pendidikan (3 jam kredit)

PWX8001 Educational Research Philosophy and Methodology (3 credit hours)

Kursus ini akan fokus kepada falsafah dalam penyelidikan pendidikan. Tiga falsafah yang akan diteliti dan dibincang adalah perspektif positivism, interpretivisme dan teori kritikal dari aspek epistemology, ontology dan paradigma. Analisis literatur akan digunakan untuk meneliti bagaimana tiga perspektif falsafah ini mempengaruhi pendekatan penilaian dan rekabentuk proses penyelidikan.

This course traces the underlying the major philosophical underpinnings of educational research. The basic tenet, epistemology, ontology and paradigm of three major philosophical perspectives – positivism, interpretivism and critical theory – will be discussed. A close analysis of existing literature will be used to unfold how these philosophical underpinnings profoundly influences the way research is designed and evaluated.

PWX8002 Disertasi (56 jam kredit)

PWX8002 Educational Research Philosophy and Methodology (56 credit hours)

Kursus ini memerlukan pelajar untuk menyediakan satu cadangan Penyelidikan (termasuk ulasan literature yang lengkap), bentang usul cadangan, menjalankan plan rekabentuk penyelidikan (termasuk kutipan data dan analisis) dan akhirnya menulis satu laporan dan membentangkan dapatan kajian. Pelajar akan diselia oleh ahli Fakulti. Pada akhir program satu disertasi akan diserahkan untuk pemeriksaan.

This course requires the student to prepare a research proposal (including a comprehensive literature review), defend the proposal, carry out the plan in the proposal (including data collection and analysis), and finally report and defend the findings. Students would be supervised by a member(s) of the faculty. A dissertation is submitted for examination at the end of the program.

PWX8003 Seminar Kedoktoran 1 (3 jam kredit)
PWX8003 Doctoral Seminar 1 (3 credit hours)

Kursus ini adalah untuk pelajar mengembangkan cadangan penyelidikan berasaskan peluang berbincang dengan komuniti program Doktor Falsafah di Fakulti Pendidikan yang terdiri daripada rakan dan pensyarah. Pelajar akan membenteng dan berbincang kerja mereka, menerima maklumbalas yang mempertingkatkan mutu usul cadangan mereka secara berterusan.

This course is for students to develop their research proposal with opportunities for ongoing discourse with an extended learning community in the Faculty of Education doctoral program, consisting of fellow graduate students and members of the faculty. Students will present and discuss their work-in-progress proposals, receive feedback from fellow classmates and the instructor, and make relevant improvements..

PWA8001 Kaedah Penyelidikan Kuantitatif dalam Pendidikan (3 jam kredit)
PWA8001 Quantitative Research Approaches in Education (3 credit hours)

Pelajar akan mempelajari perkara-perkara penting dalam menggubal penyelidikan kuantitatif bagi membolehkan calon menyediakan suatu cadangan penyelidikan yang mantap. Tajuk yang akan dibincangkan dalam kursus ini termasuk pemilihan dan definisi sesuatu masalah, menyediakan dan menilai sesuatu rancangan penyelidikan; pemilihan sampel dan alat pengukuran yang bersesuaian, penerangan reka bentuk penyelidikan kuantitatif serta pertimbangan etika dan perundangan dalam menjalankan kajian. Kursus ini akan meninjau reka bentuk penyelidikan kuantitatif yang spesifik seperti kaedah tinjauan, kaedah kausal-komparatif, kaedah eksperimental, kaedah korelasi; dan seterusnya.

In this course, candidates will be exposed to advanced quantitative methods in educational research so they can demonstrate practical understanding of those techniques. The course will explore several methods and techniques in quantitative research such as sampling, data gathering techniques, design procedures, measurement and instrumentation, as well as ethical and legal considerations in conducting quantitative research. The course will also deal in-depth with research issues on validity and reliability, the survey method, experimental method, causal-comparative, correlational survey, and so forth

PWA8002 Statistik Lanjutan dalam Penyelidikan Pendidikan (3 jam kredit)
PWA8002 Advanced Statistics in Educational Research (3 credit hours)

Kursus ini menyediakan pelajar dengan kemahiran untuk menganalisis data daripada penyelidikan pendidikan. Pelajar akan mendapat pendedahan tentang explorasi data deskriptif, statistik inferensi, ujian korelasi dan regresi linear mudah dan statistik tak berparameter. Perisian komputer akan digunakan semasa menganalisis data.

This course provides students with skills to analyze data from educational research. Students will gain exposure on data exploration descriptive, inferential statistics , test correlation and simple linear regression and nonparametric statistics . Computer software will be used when analyzing the data.

PWA8003 Analisis Data Multivariat (3 jam kredit)

PWA8003 Multivariate Data Analysis (3 credit hours)

Kursus ini direkabentuk untuk membantu pelajar mengaplikasikan teknik analisis multivariate dalam penyelidikan. Kursus ini bermula dengan penghuraian konsep dari algebra matrik dan perbincangan ciri-ciri taburan normal multivariate. Regresi multipel dan regresi multivariat juga dibincang. Perbandingan pelbagai variabel antara kumpulan; kaedah menguji perbezaan min dan kovarians juga akan diperkenalkan. Analisis diskriminan dan kaedah analisis klasifikasi juga akan diperkenalkan. Kursus ini akhir dengan perbincangan analisis komponen principal dan analisis faktor.

The course is designed to assist students in applying multivariate on analysis techniques for research in education. The course begins with a review/introduction to basic concepts from matrix algebra and a discussion of the properties of the multivariate normal distribution. Multiple regression is briefly reviewed and multivariate regression is mentioned. The class then discusses methods for comparing groups on several variables; methods for testing for differences of means and covariances will be introduced. Discriminant analysis and classification analysis methods are then introduced. The course concludes with a discussion of principal components analysis and factor analysis.

PWA8004 Analisis Struktur Latent (3 jam kredit)

PWA8004 Latent Structure Analysis (3 credit hours)

Kursus ini memperkenalkan model variable latent dan kemahiran confirmatory factor analysis, structural equation models, dan lanjutan latent model-model tersebut. Analisis struktur latent adalah kaedah yang melibatkan variabel latent dan manifest. Variabel manifest boleh diperhatikan dan Variabel latent adalah konstruk teori dan tidak dapat 'diperhatikan'. Jangkaan, kovarians, regresi, maximum likelihood estimation, generalized least squares, path analysis, confirmatory factory analysis, measurement models, and structural equations juga terlibat. Pelajar akan dapat melukis model dan menulis model sebagai satu sistem persamaan, menulis dan run program serta menginterpretasikan keputusan analisis.

This course will introduce latent variable models. and confirmatory factor analysis, structural equation models skills and latent class extensions of these models. Latent structure analysis is a general class of methods that involve manifest and latent variables that are continuous or categorical. Manifest variables are observed and are usually used as measures of the latent variables. Latent variables are not observed and are the constructs of interest in a theory. Expectations, covariance, regression, maximum likelihood estimation, generalized least squares, path analysis, confirmatory factory analysis, measurement models, and structural equations. You will learn how to diagram the model, write it as a system of equations, write

and run a program, and interpret the results.

PWA8005 Keadah Penyelidikan Kualitatif dalam Pendidikan (3 jam kredit)

PWA8005 Qualitative Research Approaches in Education (3 credit hours)

Kursus ini memperkenalkan kepada pelajar beberapa prinsip kaedah penyelidikan kualitatif. Ia akan meneliti secara mendalam beberapa isu berhubungkait dengan perbezaan antara pelbagai rekabentuk yang terdapat dalam kajian kualitatif seperti kajian kes, etnografi, fenomenologi dan lain-lain. Pelajar berpeluang untuk merangka pernyataan masalah, objektif dan soalan kajian, pemilihan sampel dan mengenalpasti pelbagai cara yang digunakan dalam pungutan data kualitatif seperti temubual, pemerhatian, analisis dokumen. Pelajar juga akan didedahkan dengan pelbagai isu yang berkaitan dengan kajian kualitatif seperti etika penyelidikan, kesahan dan kebolehpercayaan. Bagi membolehkan pelajar mendapat kemahiran secara praktikal, mereka dikehendaki menghasilkan satu cadangan penyelidikan yang menggunakan rekabentuk kajian kualitatif.

This course introduces students to the principles of qualitative research methods. It examines in depth issues relating to differences between various the qualitative research methods such as case study, ethnography, phenomenology etc. in terms of philosophical foundations, theoretical framework and data collection. Specific focus will be given on the training in question development, selection of sampling strategy, determination of data collection techniques such as interviewing, making observation, and document analysis, etc. Students will also be exposed to issues related to qualitative research methodology such as ethical issues, validity and reliability. Scholarly presentation and writing of qualitative research proposal will also be reviewed.

PWA8006 Teori dan Amalan dalam Kurikulum (3 jam kredit)
PWA8006 Theory and Practice in Curriculum (3 credit hours)

Tokoh-tokoh dalam teori kurikulum telah menulis secara meluas dan pelbagai tentang klasifikasi pemikiran kurikulum. Kursus ini meneliti secara kritikal teori kurikulum dengan memberi perhatian kepada pengaruh-pengaruh ideologi, politik, sosial, budaya, psikologi, epistemologi serta pegangan agama dan falsafah. Tumpuan ialah kepada perspektif awal kurikulum, perubahan fokus kurikulum yang dipengaruhi oleh pelbagai aliran (spt. Progresif, konstruktivisme), konsepsi pengetahuan dan perkembangan teknologi. Konsep tentang rekabentuk kurikulum dan perancangan kurikulum akan dibincangkan dengan terperinci dan juga berdasarkan kepada analisis perbandingan pelbagai bidang. Tumpuan juga diberi kepada masa depan kurikulum dengan merujuk kepada perkembangan globalisasi dan masyarakat berasaskan pengetahuan.

Curriculum theorists have written diversely and at length about the classification of different curriculum thought. This course critically reviews those curriculum theories in relation to the ideological, socio-political, cultural, psychological, epistemological influences including beliefs in religion and philosophy. Focus on early curriculum perspectives, changes on curriculum focus which were influenced by various schools of thought (e.g. Progressivism, Constructivism), knowledge conception and technological development. The concept of curriculum design and curriculum planning will be discussed in detail and also will be based on a comparative analysis of the various fields. Attention is also given to the future curriculum with reference to globalization and knowledge based society

PWA8007 Pelaksanaan dan Penilaian Kurikulum (3 jam kredit)
PWA8007 Curriculum Implementation and Evaluation (3 credit hours)

Kurikulum tidak boleh dianggap telah berakhir dengan penulisan dokumen. Malahan, ia adalah dokumen sementara yang memerlukan penambahbaikan. Oleh itu, tugas penilaian program dan kurikulum tidak akan berakhir apabila kurikulum dilaksanakan. Kursus ini direkabentuk untuk memenuhi keperluan khusus para pendidik dari pelbagai bidang pengkhususan – Pendidikan Bahasa, Kurikulum dan Pengajaran, Matematik dan Sains, dan Sains Sosial. Pelajar akan membina kemahiran dalam merancang pelaksanaan dan penilaian bagi penambahbaikan mutu kurikulum dalam pelbagai bidang. Tumpuan perbincangan meliputi teori, model dan pendekatan dalam pelaksanaan dan penilaian kurikulum, pemantauan pelaksanaan kurikulum, penaksiran impak program dan analisis faedah program. Asas pengetahuan yang diberikan dalam kursus ini membolehkan pelajar membuat aplikasi ke dalam bidang tertentu.

A curriculum should never be considered a final draft. Rather, it is an interim document awaiting further improvement. The task of curriculum and program evaluation, therefore, does not end when a curriculum is implemented. This course is designed to meet the specific needs of educators through specialization in several areas – Language Education, Curriculum and Instruction, Mathematics and Science Education, and Social Sciences. Students will develop skills in planning the implementation and evaluation towards the

improvement of curriculum quality for various disciplines. Discussions are focused on theories, models and approaches of curriculum implementation and evaluation, impact assessment of the program and analysis on the program benefits, curriculum improvement and decision making process. Basic knowledge gained from this course will benefit the students when applied to their respective fields.

PWA8009 Teori dan Penyelidikan dalam Pembelajaran dan Teknologi (3 jam kredit) **PWA8009 Theory and Research on Learning and Technology (3 credit hours)**

Kursus ini akan bincang kedudukan teori dan penyelidikan pendidikan berasaskan persekitaran pembelajaran yang berbeza (semuka; blended dan atas talian). Kedudukan teori yang berbeza ini akan digunakan untuk memahami bagaimana pelajar belajar dan bagaimana rekabentuk pengajaran akan impak pembelajaran. Kursus ini juga akan meneliti pendekatan teori dan kaedah untuk menyelidik pembelajaran

pelajar dalam setting yang berlainan.

This course will discuss major theoretical positions and research on learning, in different learning environments (face-to-face, blended and online). The different theoretical positions will be used to understand how students learn, and how different instructional designs can impact student learning. It will also examine theoretical and research approaches to investigating students' learning in different settings. .

PWA8010 Penilaian Pembelajaran (3 jam kredit) **PWA8010 Assessment of Learning (3 credit hours)**

Kursus ini akan melihat pada latar belakang sejarah dan pembangunan teori dan prinsip penilaian (AfL, formatif, sumatif, alternatif dan holistik) dan bagaimana semua ini membawa impak kepada pembelajaran pelajar. Pelajar akan ulas literatur dan tren penilaian secara kritikal agar dapat extrapolate pengetahuan ini untuk menentukan tren rekabentuk penyelidikan berkaitan penilaian masa akan datang. Pelajar juga akan didedahkan kepada aktiviti rekabentuk dan penilaian untuk mempertingkatkan pembelajaran pelajar dalam aspek penilaian bilik darjah.

In this course, the historical background and the development of assessment theories and principles (AfL, formative, summative, alternative, holistic) and how this impact student learning will be discussed. Students will critically review research and trends in assessment and to extrapolate this knowledge to examine and design research on future trends in assessment. The students will also be exposed to designing and evaluating assessment activities that would enhance student learning while keeping in mind practical aspects of assessment in the classrooms.

PWA8012 Falsafah Pengurusan dan Organisasi (3 jam kredit)

PWA8012 Philosophy of Management and Organization (3 credit hours)

Kursus ini membincangkan proses pembinaan falsafah pengurusan organisasi dari perspektif Barat dan Timur. Kajian perbandingan dibuat antara falsafah yang mendasari sistem ekonomi utama dunia seperti kapitalis dan sosialis dengan falsafah yang diamalkan oleh mazhab-mazhab pengurusan Barat seperti klasik, behavioral, sistem, dan contingency. Perbincangan juga mencakupi tokoh-tokoh falsafah terkemuka Barat dan Timur. Kursus ini menjurus kepada proses pembinaan falsafah pengurusan organisasi yang relevan kepada bidang pendidikan menerusi pengubahsuaian unsur-unsur model pengurusan dan kepimpinan.

The process of developing organizational management philosophy will be discussed, utilizing the Western and Eastern perspectives. It involves comparative studies between the philosophies that underpinned world's major economic systems such as capitalist and socialist, and the philosophies of classical, behavioural, systems, and contingency schools of management. The contributions of leading Western and Eastern philosophers are discussed. Management and organization theories are synthesized to develop relevant philosophy and model for educational management and leadership

PO4	Mengamalkan nilai murni, sikap positif dan etika profesionisme dalam bidang teknologi pengajaran bagi pembelajaran. <i>Practice good values, positive attitudes and professional ethics in the field of instructional technology for learning.</i>
PO5	Mengaplikasi pengetahuan teknologi pengajaran untuk memperkukuhkan komunikasi, meningkatkan kepimpinan dan bekerjasama dalam pasukan dan komuniti pembelajaran <i>Apply knowledge of instructional technology to strengthen communication as well as to enhance leadership and collaboration in learning teams and communities</i>
PO6	Menganalisis teori, polisi dan isu dalam bidang teknologi pengajaran secara kritis untuk menjalankan penyelidikan bagi menghasilkan idea inovatif bagi menyelesaikan masalah dalam bidang teknologi pengajaran <i>Analyze theories, policies and issues in instructional design and technology to conduct research to generate innovative ideas for solving problems in instructional technology</i>
PO7	Melibatkan diri dalam pembelajaran sepanjang hayat dan menguruskan maklumat berkaitan dengan teknologi pengajaran secara berkesan. <i>Engage in lifelong learning and manage information related to instructional technology .</i>

6. **Struktur Program**

Struktur Program Sarjana Teknologi Pengajaran (Reka Bentuk Pengajaran) berasaskan pendekatan bersifat kontemporari untuk melahirkan guru, pensyarah, jurulatih dan perekabentuk instruksi yang cemerlang. Kandungan kurikulum direkabentuk berdasarkan perkembangan ilmu pendidikan daripada perspektif perkhidmatan dan pengajaran yang sejajar dengan Falsafah Pendidikan Kebangsaan, Wawasan Negara serta Pelan Transformasi Negara dan Pelan Pembangunan Pendidikan 2013-2025.

Program ini merangkumi Empat Puluh Lima (45) jam kredit yang merangkumi Sembilan (9) jam kredit bagi Kursus Teras Program (Wajib Bidang Pengkhususan), Enam (6) jam kredit bagi Kursus Elektif Bidang Pengkhususan dan Tiga Puluh (30) jam kredit bagi disertasi yang melibatkan aktiviti kuliah, tugas, perbincangan, pembentangan, penyelidikan, lawatan dan pendekatan yang berasaskan teknologi.

Programme Structure

The Master of Instructional Technology (Instructional Design) program structure is based on a contemporary approach to cultivate excellent educators, teachers, trainers and instructional designers. Curriculum content is designed based on the development of education from the perspective of services and teaching in line with the National Philosophy of Education, National Vision, National Transformation Plan and Malaysian Education Development Plan (Higher Education) 2013-2025.

The program includes Forty-five (45) credit hours including Nine (9) credit hours for the Program Core Course (Required for Specialization), Six (6) credit hours for Specialized Elective Courses and Thirty (30) credit hours for dissertations involving lectures, assignments, discussions, presentations, research, visits and technology-based approaches.

1. Pendaftaran Kursus / Course Registration

- (1) Pendaftaran kursus dilakukan dalam tempoh selama dua (2) minggu dari tarikh permulaan semester.

Course registration must be completed within two (2) weeks from the date the semester begins.

- (2) Seseorang calon hendaklah mendaftar sekurang-kurangnya tiga (3) kredit kursus termasuk kredit yang diperuntukan bagi penyelidikan pada mana-mana semester melainkan ia diluluskan penarikan diri daripada semester berkenaan

The candidate must register for at least three (3) credits hours including credit allocated for research in any given semester unless withdrawal from that semester has been approved.

2. Penyeliaan / Supervision

Pelantikan penyelia dilakukan tidak lewat daripada semester pertama pengajian.

Appointment of supervisor must be done not later than the first semester of study.

3. Ketetapan Bidang Penyelidikan / Determination of Research Area

Ketetapan bidang bagi disertasi hendaklah dilakukan sebelum calon memulakan penyelidikannya.

Determination of the research area must be carried out before the candidate begins his/her research.

4. Pembentangan Seminar 1 dan Seminar 2

Proposal Defence and Candidature Defence Presentation

Membentangkan cadangan penyelidikan dalam Proposal Defence;

Present your research proposal at Proposal Defence;

Membentangkan kemajuan penyelidikan dalam Candidature Defence;

Present your research progress at Candidature Defence;

5. Penyerahan / Submission

- (1) Tajuk disertasi hendaklah dikemukakan kepada Fakulti untuk kelulusan semasa calon memberi notis untuk penyerahan disertasinya.

The dissertation title must be submitted to the Faculty for approval when the candidate gives notice for the submission of his/her dissertation.

- (2) Calon hendaklah menyerahkan disertasi untuk peperiksaan dalam tempoh pencalonannya. Tempoh yang diambil untuk pemeriksaan disertasi dan apa-apa tempoh pembetulan atau kajian lanjut yang diperlukan oleh Jawatankuasa Pemeriksa tidak dianggap sebagai sebahagian daripada tempoh maksimum pencalonan calon.

The candidate shall submit his/her dissertation for examination within the candidacy period. The time taken for the examination of dissertation and any period of correction or further review required by the Examination Committee is not considered as part of the maximum candidature period.

SINOPSIS KURSUS / COURSE SYNOPSIS

POA7001 Kaedah Penyelidikan dalam Teknologi Pengajaran (3 Jam Kredit)

POA7001 *Research method in instructional technology (3 Credit Hours)*

Sinopsis/Synopsis

Kursus ini bertujuan untuk memberikan panduan kepada pelajar-pelajar pasca ijazah teknologi pengajaran bersedia untuk menjalankan penyelidikan dalam teknologi pengajaran. Isu semasa yang relevan kepada penyelidikan dalam bidang teknologi pengajaran, serta trend penyelidikan dalam bidang ini akan dibincang sebagai panduan untuk melaksanakan cadangan penyelidikan yang kukuh.

The course is intended to guide Instructional technology postgraduate students who are ready to carry out research in instructional technology. Relevant issues and research in the field of instructional technology and related fields, as well as the research trends in this field will be discussed and guide learners to design a strong research proposal.

POA7002 Rekabentuk Pengajaran dan Teknologi (3 Jam Kredit)

POA7002 *Instructional Design and Technology (3 Credit Hours)*

Sinopsis/Synopsis

Kursus ini memperkenalkan kepada pelajar-pelajar tentang prinsip-prinsip asas dan konsep rekabentuk pengajaran dan teknologi sebagai proses membentuk strategi pilihan untuk menyelesaikan masalah berkaitan dengan pengajaran dan pembelajaran. Pendekatan rekabentuk dan pembangunan yang digunakan akan merangkumi prinsip reka bentuk pengajaran dan teknologi, teori pembelajaran, model pengajaran, proses mengenal pasti masalah dalam pengajaran dan pembelajaran, mereka bentuk dan membentuk strategi pilihan dan bahan untuk menyelesaikan masalah, dan menilai serta menguruskan proses pembangunan selaras dengan keperluan hasil pembelajaran.

This course introduces students to the basic principles and concepts of instructional design and technology as a process to develop alternative strategies to solve problems related to teaching and learning. A design and developmental approach is used and covers the basic principles of instructional design and technology, instructional design models, learning theories, the process to identify problems in teaching and learning, designing and developing alternative strategies and materials to solve problems, and evaluating and managing the whole development process in line with the learning outcomes.

POA7003 Rekabentuk Komuniti Pembelajaran (3 Jam Kredit)**POA7003 Design of Learning Communities (3 Credit Hours)**

Sinopsis/Synopsis

Kursus ini direkabentuk untuk memperkenalkan konsep, prinsip dan proses asas dalam membangunkan persekitaran dan komuniti pembelajaran yang berasaskan web dan secara 'blended.' Melalui pelbagai aktiviti pembelajaran, pelajar akan menggunakan pelbagai sumber untuk membina pengetahuan dan kemahiran dalam membentuk dan membangunkan persekitaran dan komuniti yang sesuai untuk pembelajaran. Pelajar juga akan mempunyai peluang membuat refleksi dan mempertimbangkan bagaimana mengintegrasikan pengetahuan dan kemahiran ini dalam konteks pengajaran mereka.

This course is designed to introduce students to the basic concepts, principles and processes in developing blended and web-based learning environments and communities. Through a number of learning activities, students will use a variety of resources to develop basic knowledge and skills in creating learning environments and communities conducive for learning. Students will also have the opportunity to reflect and consider how to integrate these knowledge and skills into their teaching repertoire and context.

POA7004 Rekabentuk Sistem Pembelajaran Digital Lanjutan (3 Jam Kredit)**POA7004 Advanced studies in Instructional Design of Digital Systems (3 Credit Hours)**

Sinopsis/Synopsis

Kursus ini memberi peluang membincangkan teori pembelajaran dan reka bentuk yang sesuai serta maklumat penyelidikan secara kritis untuk memupuk pembelajaran dan pemikiran aras tinggi (dicirikan oleh usaha kolektif persefahaman dan mewujudkan dan memajukan pengetahuan) dalam persekitaran pembelajaran digital. Satu projek berasaskan penyelidikan akan dijalankan untuk mengintegrasikan dan mengaplikasikan teori, prinsip dan kemahiran reka bentuk atau membangunkan persekitaran pembelajaran digital yang boleh memupuk pembelajaran pada peringkat lanjutan.

This course provides opportunities to critically discuss appropriate learning and design theories as well as research literature for fostering advanced learning (characterized by sustained individual and collective

efforts of understanding, creating and advancing knowledge) in digital learning environments. A research-based project will be carried out in order to bridge theory and practice for designing and/or developing a digital learning environment that can foster learning at the advanced levels.

POX 7002 Disertasi (30 jam kredit)
POX 7002 Dissertation (30 credit hours)

Kursus ini memerlukan pelajar meformulasikan masalah kajian dan kerangka konseptual/ teori yang berkaitan dalam mana-mana bidang relevan untuk program yang didaftarkan dan menjalankan kajian secara koheren. Pelajar akan menjalankan ulasan literatur dan mengaplikasikan kaedah sesuai untuk kutipan data dan analisis. Pelajar akan di selia oleh seorang penyelia sepanjang proses ini. Satu disertasi akan di serahkan untuk penilaian.

This course requires the student to formulate a research problem and the related conceptual/ theoretical frameworks in any relevant field for the programme registered for and carry out the research coherently. Students would conduct a comprehensive review of the relevant literature, and use appropriate methods of data collection and analysis. Students would be supervised by a lecturer throughout the process. A dissertation will be submitted for examination.

PQX7001 Statistik untuk Penyelidikan dalam Pendidikan (3 kredit)

PQX7001 Statistics in Research in Education (3 credits)

Sinopsis/Synopsis

Kursus ini direkabentuk untuk membantu pelajar menggunakan statistik asas dalam penyelidikan pendidikan. Melalui tugas praktikal, pelajar akan mempelajari cara menggunakan prosedur statistik yang sesuai. Di samping itu, cara mengenal pasti masalah dalam analisis data seperti kes ekstrim (outlier), taburan tidak normal dan lain-lain juga akan dibincangkan. Data daripada penyelidikan pendidikan akan digunakan untuk menunjukkan bagaimana teknik statistik diaplikasi, ditafsir dan dilaporkan menurut format APA. Isi kandungan kursus ini termasuk organisasi data, perwakilan secara grafik, ukuran kecenderungan memusat, ukuran kebolehubahan, skala pengukuran, taburan normal, konsep pengujian hipotesis, perbandingan perbezaan antara dua min (sample besar dan kecil), perbandingan perbezaan antara dua varians, jadual kontingensi, pengujian khi kuasa dua, ujian korelasi Pearson, persampelan rawak yang ringkas dan ANOVA satu hala. Secara umum kursus ini merangkumi teknik prosedur deskriptif dan inferensi penting yang digunakan dalam penyelidikan pendidikan. Indeks saiz kesan dan cara meningkatkan kuasa sesuatu prosedur statistik juga akan dibincangkan.

The course is designed to assist students in applying basic statistics for research in education. Through practical assignments, students not only learn how to apply the statistical techniques. In addition, the methods in identifying in the problems in data analysis such as extreme values(outliers), non-normal distribution will be discussed. Data from educational research journals are used to illustrate how the statistical techniques are applied, described and reported using the APA format. The contents cover the organisation of data, graphical representation of data, measurements of variables, central tendency and variability; measurement scales; normal distribution; concept of hypothesis testing, comparison of means (small and large samples), comparison of variances, contingency tables, Chi Square test, Pearson correlation, random sample and one-way ANOVA. In general the course covers the most important descriptive and inferential statistical techniques used in educational research. Effect size indices and statistical power will be discussed.

4. Matlamat Program

Untuk menghasilkan graduan yang profesional, dinamik dan reflektif serta berupaya memantau dan memperbaiki amalan, mengaplikasikan teori dan pengetahuan praktikal, menjalankan penyelidikan dan mampu menghadapi cabaran masa kini di peringkat nasional dan global.

Programme Aim

To produce graduates who are professional, dynamic, reflective and capable of monitoring and improving their practices, applying practical theories and knowledge, conducting research and being able to meet current and global challenges.

5. Hasil Pembelajaran Program

Programme Learning Outcomes

Di akhir program, pelajar dapat;

At the end of programme, student will be able to;

Domain MQF	Hasil Pembelajaran / Learning Outcomes
PO1	Menguasai pengetahuan yang relevan dan terkini dalam bidang Pendidikan Matematik. <i>Master relevant and current knowledge in the field of Mathematics Education.</i>
PO2	Mengaplikasi pengetahuan yang berfaedah dalam Pendidikan Matematik melalui pembelajaran, pengajaran, dan penyelidikan termasuk penggunaan teknologi maklumat dan komunikasi sebagai pengupaya. <i>Apply useful knowledge in Mathematics Education through learning, teaching, and research including the use of information and communication technology.</i>
PO3	Membentuk sikap keprihatinan terhadap pembangunan dan pengukuhan bidang Pendidikan Matematik. <i>Develop a caring attitude towards the development and strengthening of Mathematics Education.</i>
PO4	Mengembangkan adab, nilai dan etika yang baik dalam bidang pendidikan Matematik. <i>Develop good manners, values and ethics in the field of Mathematics education.</i>
PO5	Mengukuhkan jalinan kerjasama yang kreatif dengan pelbagai pihak bagi menjayakan aktiviti bermanfaat dalam bidang Pendidikan Matematik. <i>Establish creative partnerships with various parties to generate rewarding activities in the field of Mathematics education.</i>
PO6	Menganalisis dan mensintesis pelbagai pendekatan, polisi, dan fahaman dalam bidang Pendidikan Matematik secara kritis dan menyeluruh. <i>Analyse and synthesise various critical and comprehensive approaches, policies, and understandings in the field of Mathematics Education.</i>
PO7	Mengamalkan pembelajaran sepanjang hayat bagi meningkatkan tahap profesionalisme dalam bidang pendidikan Matematik. <i>Practice lifelong learning to enhance the level of professionalism in Mathematics education.</i>

6. Struktur Program

Struktur Program Sarjana Pendidikan (Pendidikan Matematik) berasaskan pendekatan bersifat kontemporari untuk melahirkan warga pendidik yang cemerlang. Kandungan kurikulum direkabentuk bersandarkan perkembangan ilmu pendidikan daripada perspektif perkhidmatan dan pengajaran yang sejajar dengan Falsafah Pendidikan Kebangsaan, Wawasan Negara serta Pelan Transformasi Negara.

Program ini merangkumi Empat Puluh Lima (45) jam kredit yang merangkumi Dua Belas (12) jam kredit bagi kursus teras, Tiga (3) jam kredit bagi kursus elektif serta Tiga Puluh (30) jam kredit bagi disertasi / laporan penyelidikan yang melibatkan aktiviti kuliah, tugas, perbincangan, pembentangan, penyelidikan, lawatan dan pendekatan yang berasaskan teknologi.

Programme Structure

The Master of Education (Mathematics Education) Program is structured based on a contemporary approach to produce excellent and outstanding educators. The curriculum content is designed based on the current development of education from the perspective of services and teaching in line with the National Philosophy of Education, National Vision and the National Transformation Plan.

The program covers Forty-five (45) credit hours which includes twelve (12) credit hours for core courses, three (3) credit hours for elective courses and thirty (30) credit hours for dissertation / research reports involving courseworks, lectures, assignments, discussions, presentations, research, visits and technology-based approaches.

1. Pendaftaran Kursus / Course Registration

- (1) Pendaftaran kursus dilakukan dalam tempoh selama dua (2) minggu dari tarikh permulaan semester.

Course registration must be completed within two (2) weeks from the date the semester begins

- (2) Seseorang calon hendaklah mendaftar sekurang-kurangnya tiga (3) kredit kursus termasuk kredit yang diperuntukan bagi penyelidikan pada mana-mana semester melainkan ia diluluskan penarikan diri daripada semester berkenaan

The candidate must register for at least three (3) credits hours including credit allocated for research in any given semester unless withdrawal from that semester has been approved.

2. Penyeliaan / Supervision

Pelantikan penyelia dilakukan tidak lewat daripada semester pertama pengajian.

Appointment of supervisor must be done not later than the first semester of study.

3. Ketetapan Bidang Penyelidikan / Determination of Research Area

Ketetapan bidang bagi disertasi hendaklah dilakukan sebelum calon memulakan penyelidikannya.

Determination of the research area must be carried out before the candidate begins his/her research.

4. Pembentangan Seminar 1 dan Seminar 2

5. Penyerahan / Submission

- (1) Tajuk disertasi hendaklah dikemukakan kepada Fakulti untuk kelulusan semasa calon memberi notis untuk penyerahan disertasinya.

The dissertation title must be submitted to the Faculty for approval when the candidate gives notice for the submission of his/her dissertation

- (2) Calon hendaklah menyerahkan disertasi untuk peperiksaan dalam tempoh pencalonannya. Tempoh yang diambil untuk pemeriksaan disertasi dan apa-apa tempoh pembetulan atau kajian lanjut yang diperlukan oleh Jawatankuasa Pemeriksa tidak dianggap sebagai sebahagian daripada tempoh maksimum pencalonan calon.

The candidate shall submit his/her dissertation for examination within the candidacy period. The time taken for the examination of dissertation and any period of correction or further review required by the Examination Committee is not considered as part of the maximum candidature period.

SINOPSIS KURSUS / COURSE SYNOPSIS

POD7001 Kaedah Penyelidikan dalam Pendidikan Matematik (3 Jam Kredit) **POD7001 Research Methods in Mathematics Education (3 Credit Hours)**

Sinopsis/Synopsis

Kursus ini ditawarkan khusus bagi pelajar yang akan menjalankan penyelidikan untuk tesis, disertasi atau kertas projek. Antara lain, tumpuan akan diberi kepada beberapa jenis penyelidikan dalam pendidikan matematik berdasarkan perspektif teori yang berbeza dan membincangkan cara untuk melaksanakan agenda penyelidikan. Perhatian yang khusus akan dibeeeri terhadap pemahaman tentang prosedur untuk mengumpul, menganalisis, dan mentafsir data kualitatif dan kuantitatif..

The aim of this course is to assist students in understanding the different theoretical perspectives in mathematics education research including the philosophical and psychological perspectives. Research concepts, skills and the competencies required to construct mathematics education to form an agenda for research will be discussed. Special focus will be given to discussion on the nature of conducting research, various research methods and approaches and current research trends in mathematics education.

POD7002 Perkembangan Kurikulum dalam Pendidikan Matematik (3 Jam Kredit) **POD7002 Curriculum Development in Mathematics Education (3 Credit Hours)**

Sinopsis/Synopsis

Kursus ini bertumpu kepada proses dalam kurikulum matematik yang berkaitan dengan identifikasi matlamat, pengembangan program, pelaksanaan, dan penilaian. Asas sejarah, falsafah, dan sosiologi bagi reka bentuk dan perancangan kurikulum dalam pendidikan matematik akan dibincangkan. Kursus ini juga akan meneliti kurikulum matematik sekolah rendah dan menengah, dengan penekanan kepada bentuk program masa kini, aliran semasa dalam reka bentuk dan isi kandungan, skop dan susunan, inovasi, dan proses reformasi. Tumpuan adalah kepada usaha mengenal pasti isu dan masalah bagi tujuan penyelidikan.

The course focuses on the development process of mathematics curriculum; particularly that is related to the identification of the goal in mathematics education, development of the programme, its implementation and evaluation. History, philosophy and sociology forms as the basis in the mathematics curriculum design will be discussed. This course also gives students the opportunity to analyze the primary and secondary school mathematics, with the emphases on the structure of the present program, the current trend in the curriculum design and content, scope and organization, innovation and the process of reform. Focus will be given to the identification of issues and challenges for research.

POD7004 Pentaksiran dalam Pendidikan Matematik (3 Jam Kredit)
POD7004 Advanced Research in Mathematics Education (3 Credit Hours)

Sinopsis/Synopsis

Perbincangan dalam kursus ini merangkumi latar belakang sejarah, teori dan kajian terkini tentang cara pelajar dinilai dalam pendidikan matematik. Selain itu, topik lain termasuklah fokus terhadap aspek teori dan praktik penilaian dalam kelas matematik, meneliti perhubungan antara penilaian dan kurikulum dalam konteks skop yang lebih luas, dan seterusnya analisis kritikal tentang tujuan, strategi, kaedah dan model penilaian berkesan dalam pendidikan matematik. Juga, perspektif konstruktif dan bersepadu tentang penilaian dalam pendidikan matematik serta penilaian alternatif yang menggambarkan perubahan terkini akan dibincangkan

In this course, the historical background theories and recent research into the ways in which students are assessed in mathematics education will be discussed. This includes a focus on theoretical and practical aspects of assessment in the mathematics classroom, examination of the relationships between assessment and curriculum in the wider sense, and a critical analysis of the purpose, strategies, methods and effective models of assessment in mathematics education. Also, constructive and integrated perspective on assessments that reflect recent changes in mathematics curriculum will be discussed.

POD7005 Penyelesaian Masalah dalam Pendidikan Matematik (3 Jam Kredit)
POD7005 Problem Solving in Mathematics Education (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini akan melibatkan penyelesaian masalah matematik secara meluas. Pengalaman tersebut akan dijadikan landasan bagi membincangkan teori tentang kebolehan dan proses penyelesaian masalah matematik. Teknik pengajaran penyelesaian masalah matematik di peringkat sekolah rendah dan menengah akan diteliti dan penyusunan kurikulum bagi memuatkan penyelesaian masalah ke dalam program pendidikan matematik di peringkat sekolah rendah dan menengah akan dibincangkan. Kursus ini juga akan membincangkan isu, cabaran, dan perspektif baru berkaitan penyelidikan tentang pengajaran dan pembelajaran kebolehan penyelesaian masalah matematik.

The course offers the opportunity for students to be involved in problem solving. The experience will be used as the foundation to discuss theory related to the process of problem solving and ability in solving problems in mathematics. Teaching and learning technique in teaching problem solving at primary and secondary schools will be covered and the organization of the curriculum for the integration of problem solving into Mathematics Education programme at primary and secondary school levels will be discussed. Issues, challenges and new perspectives on research in the teaching and learning of problem solving in mathematics will also be discussed.

POD7006 Pengajaran Matematik Masa Awal Kanak-kanak (3 Jam Kredit)

POD7006 Teaching of Mathematics in Early Childhood (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini bertujuan untuk membantu para pelajar memahami kaedah yang berkesan untuk mengajar matematik masa awal kanak-kanak. Antara topik yang akan dibincangkan termasuklah kandungan matematik dalam kurikulum pra sekolah, asas psikologi bagi pengajaran matematik masa awal kanak-kanak, pengajaran untuk pemahaman dan pembinaan, model bersepadu bagi pengajaran matematik masa awal kanak-kanak, pengajaran nombor dan konsep pengangkaan, perkembangan pemikiran geometri dan pengajaran pengukuran dalam matematik pra sekolah. Kursus ini juga akan membincangkan idea penyelidikan yang berkaitan dengan pengajaran matematik masa awal kanak-kanak.

The aim of this course is to assist students in understanding the suitable methods in teaching early mathematics to children. Topics of discussion include among others the mathematics content in the preschool curriculum, psychological basis in teaching early mathematics, teaching for understanding and construction of knowledge, an integrated model of teaching early mathematics, the teaching of numbers and numerals, the development of geometric thinking and measurement in early mathematics. This course will also discuss research ideas related to teaching of early mathematics for children.

POD7007 Teknologi dalam Pendidikan Matematik (3 Jam Kredit)
POD7007 Technology in Mathematics Education (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini akan mendedahkan pelajar dengan pengetahuan asas menggunakan teknologi dalam pengajaran dan pembelajaran matematik. Pelajar juga akan menganalisis isu penyelidikan mengenai teknologi dalam pendidikan matematik. Aktiviti menggunakan perisian dan perkakas mudah alih dapat memperkaya pengalaman pembelajaran untuk pelajar.

The course is designed to provide students with the basic knowledge of using technology in teaching and learning of school mathematics. Students will also analyse research issues regarding technology in mathematics education. Hands-on activities using software and handheld device are provided to enrich student's learning experiences.

PQX7001 Statistik untuk Penyelidikan dalam Pendidikan (3 Jam Kredit)
PQX7001 Technology in Mathematics Education (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini direkabentuk untuk membantu pelajar menggunakan statistik asas dalam penyelidikan pendidikan. Melalui tugas praktikal, pelajar akan mempelajari cara menggunakan prosedur statistik yang sesuai. Disamping itu, cara mengenalpasti masalah dalam analisis data seperti kes ekstrim (outlier), taburan tidak normal dan lain-lain juga akan dibincangkan. Data daripada penyelidikan pendidikan akan digunakan untuk menunjukkan bagaimana teknik statistik diaplikasi, ditafsir dan dilaporkan menurut format APA. Isi kandungan kursus ini termasuk organisasi data, perwakilan secara grafik, ukuran kecenderungan memusat, ukuran kebolehubahan, skala pengukuran, taburan normal, konsep pengujian hipotesis, perbandingan perbezaan antara dua min (sample besar dan kecil), perbandingan perbezaan antara dua varians, jadual kontingensi, pengujian khi kuasa dua, ujian korelasi Pearson, persampelan rawak yang ringkas dan ANOVA satu hala. Secara umum kursus ini merangkumi teknik prosedur deskriptif dan inferensi penting yang digunakan dalam penyelidikan pendidikan. Indeks saiz kesan dan cara meningkatkan kuasa sesuatu prosedur statistik juga akan dibincangkan.

The course is designed to assist students in applying basic statistics for research in education. Through practical assignments, students not only learn how to apply the statistical techniques. In addition, the methods in identifying in the problems in data analysis such as extreme values(outliers), non-normal distribution will be discussed. Data from educational research journals are used to illustrate how the statistical techniques are applied, described and reported using the APA format. The contents cover the organisation of data, graphical representation of data, measurements of variables, central tendency and variability; measurement scales; normal distribution; concept of hypothesis testing, comparison of means (small and large samples), comparison of variances, contingency tables, Chi Square test, Pearson

correlation, random sample and one-way ANOVA. In general the course covers the most important descriptive and inferential statistical techniques used in educational research. Effect size indices and statistical power will be discussed.

POX7002 Disertasi (30 Jam Kredit)
POX7002 Dissertation (30 Credit Hours)

Sinopsis/Synopsis

Kursus ini memerlukan pelajar meformulasikan masalah kajian dan kerangka konseptual / teori yang berkaitan dalam mana-mana bidang relevan untuk program yang didaftarkan dan menjalankan kajian secara koheren. Pelajar akan menjalankan ulasan literatur dan mengaplikasikan kaedah sesuai untuk kutipan data dan analisis. Pelajar akan di selia oleh seorang penyelia sepanjang proses ini. Satu disertasi akan di serahkan untuk penilaian.

This course requires the student to formulate a research problem and the related conceptual / theoretical frameworks in any relevant field for the programme registered for and carry out the research coherently. Students would conduct a comprehensive review of the relevant literature, and use appropriate methods of data collection and analysis. Students would be supervised by a lecturer throughout the process. A dissertation will be submitted for examination.

Tempoh Maksimum : 8 Semester

Duration of study

Minimum Duration : 2 Regular Semesters and 1 Special Semester
Maximum Duration : 8 Semesters

4. Matlamat Program

Untuk menghasilkan warga pendidik yang dinamik dan reflektif yang berupaya memantau dan memperbaiki amalan mereka serta boleh mengaplikasi pengetahuan praktikal, teori pendidikan, penyelidikan dan pengetahuan teknologi untuk menyelesaikan masalah yang berkaitan dengan bidang pendidikan matematik.

Programme Aim

To produce professional graduates in the field of science education with information technology and communication who are ethical, global-minded and innovative in the face of the rapid development of science and technology today.

5. Hasil Pembelajaran Program

Program Learning Outcomes

Di akhir program, pelajar dapat;

At the end of the programme, students will be able to;

Domain MQF	Hasil Pembelajaran Learning Outcomes
PO1	Menguasai pengetahuan yang relevan dan terkini tentang aplikasi teknologi sebagai pengupaya dalam Pendidikan Matematik. <i>Master knowledge about the application of Technology in mathematics education</i>
PO2	Mengaplikasikan pendekatan dan teori yang bermanfaat dan terkini tentang pembelajaran, pengajaran, dan penyelidikan matematik berlandaskan teknologi. <i>Apply the latest educational theories that is beneficial on mathematics teaching, learning and research based on Technology.</i>
PO3	Membentuk pandangan yang komprehensif dan realistik terhadap penggunaan teknologi dalam pembangunan dan pengukuhan bidang Pendidikan Matematik. <i>Practise social responsibility in the use of Information Technology in science education in the local and international arena.</i>
PO4	Mengembangkan adab, nilai, dan etika yang baik dalam pendidikan matematik dengan penggunaan teknologi sebagai pengupaya dalam Pendidikan Matematik. <i>Practise values, positive attitudes, and good ethics in mathematics education and the usage of technology as an enabler in mathematics education.</i>
PO5	Mengukuhkan rangkaian kerjasama yang kreatif dengan pelbagai pihak teknologi bagi menjayakan penggunaan teknologi dalam bidang Pendidikan Matematik. <i>Establish a comprehensive and realistic view of the use of technology in the development and strengthening of Mathematics Education</i>
PO6	Menganalisis dan mensintesis pelbagai model, pendekatan, polisi, dan fahaman yang bermanfaat tentang cara untuk menggunakan teknologi dengan berkesan dalam bidang Pendidikan Matematik. <i>Analyze and synthesize various useful models, approaches, policies, and insights on how to use technology effectively in the field of Mathematics Education</i>
PO7	Meningkatkan kemahiran berfikir aras tinggi dan komitmen terhadap pembelajaran sepanjang hayat yang boleh membantu penghayatan teknologi secara bersepadu dalam pengajaran dan pembelajaran matematik. <i>Enhance higher level thinking skills and a commitment to lifelong learning that can help integrate technology into teaching and learning mathematics.</i>

6. Struktur Program

Struktur Program Sarjana Pendidikan Matematik dengan Teknologi berasaskan pendekatan bersifat kontemporari untuk melahirkan guru/pengajar yang cemerlang. Kandungan kurikulum direkabentuk berdasarkan perkembangan ilmu pendidikan daripada perspektif perkhidmatan dan pengajaran yang sejajar dengan Falsafah Pendidikan Kebangsaan, Wawasan Negara serta Pelan Transformasi Negara.

Program ini merangkumi Empat Puluh Dua (42) jam kredit yang merangkumi Dua Belas (12) jam kredit bagi kursus teras program, Lapan Belas (18) jam kredit bagi kursus elektif dan fakulti, Dua Belas (12) jam kredit bagi laporan penyelidikan yang melibatkan aktiviti kuliah, tugas, perbincangan, pembentangan, penyelidikan, lawatan dan pendekatan yang berasaskan teknologi.

Programme Structure

The structure of the Master of Mathematics Education with Technology programme is based on a contemporary approach to produce relevant and credible science education graduates. Curriculum content is designed based on the development of education from the perspective of services and teaching in line with the National Philosophy of Education, National Vision and National Transformation Plan 2013-2025.

The program includes Forty-two (42) credit hours including Twelve (12) credit hours for core courses, Eighteen (18) credit hours for elective courses and Twelve (12) credit hours for research reports involving Lecture, discussions, e-learning, forums, projects, blended learning.

1. Pendaftaran Kursus / Course registration

- (1) Pendaftaran kursus mesti disempurnakan dalam tempoh selama dua (2) minggu dari tarikh permulaan semester.
Course registration must be completed within two (2) weeks from the date semester begins.
- (2) Seseorang calon hendaklah mendaftar sekurang-kurangnya tiga (3) jam kredit termasuk kredit yang diperuntukan bagi penyelidikan pada mana-mana semester melainkan ia diluluskan penarikan diri daripada semester berkenaan.
The candidate must register for at least three (3) credits, including credits allocated for research, in any given semester unless withdrawal from that semester has been approved.

2. Penyeliaan / Supervision

Pelantikan penyelia dilakukan tidak lewat daripada semester pertama pengajian.
Appointment of supervisor must be done no later than the first semester of study.

3. Ketetapan Bidang Penyelidikan / Determination of Research Areas

Ketetapan bidang bagi laporan penyelidikan hendaklah dilakukan sebelum calon memulakan penyelidikannya.
Determination of the research area must be carried out before the candidate begins his or her research.

4. Penyerahan / Submission

- (1) Tajuk laporan penyelidikan hendaklah dikemukakan kepada Fakulti untuk kelulusan tidak lewat dari satu (1) tahun sebelum calon menyerahkan laporan penyelidikannya untuk pemeriksaan.
The title of the research report must be submitted to the Faculty for approval no later than one (1) year before the candidate submits his/her research report for examination
- (2) Calon hendaklah menyerahkan laporan penyelidikannya untuk peperiksaan dalam tempoh pencalonannya.
The candidate shall submit his/her research report for examination within the candidacy period
- (3) Calon dikehendaki menyerahkan borang kelulusan tajuk dan mendapatkan kelulusan tajuk daripada fakulti sebelum membuat pendaftaran bagi Kertas Projek/ Laporan penyelidikan.
Candidates are required to submit FP 44/2007 Form and get an approval from faculty before register for Project Paper/ Research Report.
- (4) Bagi Calon yang belum menghabiskan kursus teras dan kursus elektif perlu melengkapkan kursus-kursus tersebut sebelum pendaftaran Kertas Projek/ Laporan penyelidikan.
Candidate are required to finished all courses before register for Project Paper/ Research Report.
- (5) Calon perlu mendaftar kursus PROGRESIF 1 dan PROGRESIF 2 bagi DUA (2) SEMESTER BERTURUT-TURUT dan membuat rujukan bersama penyelia setiap progres Kertas Projek/ Laporan penyelidikan yang dijalankan.
Candidates who has registered for Project Paper/ Research Report are required to register Progressive Course for two (2) consecutive semesters and always discuss with the appointed supervisor.

SINOPSIS KURSUS / COURSE SYNOPSIS

PQD7001 Pengajaran Algebra dengan Teknologi (3 Jam Kredit) ***PQD7001 Teaching Algebra with Technology (3 Credit Hours)***

Sinopsis/Synopsis

Kursus ini akan mendedahkan pelajar kepada konsep penting dalam pembelajaran algebra. Antara lain, tumpuan akan diberi kepada kesukaran pembelajaran dan kesilapan umum dalam pembelajaran aritmetik dan algebra. Pengalaman tersebut akan dijadikan landasan bagi membincangkan tentang pentaksiran dan proses penyelesaian masalah aritmetik dan algebra. Teknik pengajaran aritmetik dan algebra di peringkat sekolah rendah dan menengah akan diteliti dan pembinaan tugas yang melibatkan murid menggunakan teknologi akan dibincangkan. Kursus ini juga akan membincangkan isu, cabaran, dan perspektif baru berkaitan penyelidikan tentang aritmetik dan algebra.

The course offers the opportunity for students to be exposed to the important concepts in learning algebra. In addition, the focus will be on the common errors and learning difficulties faced in the learning of arithmetic and algebra. The experience will be used as the foundation to discuss the assessment and problem solving in arithmetic and algebra. Teaching and learning techniques in teaching arithmetic and algebra at primary and secondary schools will be covered and the design of tasks that involve students using digital technology at primary and secondary school levels will be discussed. Issues, challenges and new perspectives on research in arithmetic and algebra will be covered.

PQD7004 Produksi Multimedia dalam Pengajaran (3 Jam Kredit)
PQD7004 Production of Multimedia in Teaching (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini bertujuan memberi pengalaman kepada pelajar membangunkan perisian multimedia pendidikan yang berasaskan kepada gabungan teori dan kemahiran teknikal yang telah disentuh dalam kursus ini. Piawaian dan keserasian setiap komponen multimedia diberi penekanan. Aspek antara muka perisian; format akhir pakej perisian pendidikan; dan penilaian perisian yang telah dibangunkan juga akan disentuh.

This course aims to give students the experience of developing educational multimedia software based on a combination of theory and technical skills that have been covered in this course. Standards and compatibility of each multimedia component emphasized. Aspects of the software interface, end format software package for education, and evaluation of software that has been developed will also be touched.

PQD7005 Penyelesaian Masalah Matematik Berasaskan Teknologi (3 Jam Kredit)
PQD7005 Technology based Mathematical Problem (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini akan memberi peluang kepada pelajar terlibat dalam pengintegrasian teknologi digital dalam penyelesaian masalah dalam topik seperti nombor, algebra, geometri, statistik, kebarangkalian dan kalkulus. Pengalaman tersebut akan dijadikan landasan bagi membincangkan teori tentang kebolehan dan proses penyelesaian masalah matematik. Teknik pengajaran penyelesaian masalah matematik di peringkat sekolah rendah dan menengah akan diteliti dan pembinaan tugas yang melibatkan murid menggunakan teknologi dalam penyelesaian masalah matematik di peringkat sekolah rendah dan menengah akan dibincangkan. Kursus ini juga akan membincangkan isu, cabaran, dan perspektif baru berkaitan penyelidikan tentang pengintegrasian teknologi digital dalam penyelesaian masalah matematik.

The course offers the opportunity for students to be involved in solving problems in the topics of numbers, algebra, statistics, probability, geometry and calculus. The experience will be used as the foundation to discuss theory related to the process of problem solving and ability in solving problems in mathematics. Teaching and learning technique in teaching problem solving at primary and secondary schools will be covered and the design of tasks that involve students using digital technology in solving mathematical problems at primary and secondary school levels will be discussed. Issues, challenges and new perspectives on research in the integration of digital technology in problem solving in mathematics will also be discussed.

PQX7001 Statistik untuk Penyelidikan dalam Pendidikan (3 Jam Kredit)
PQX7001 Statistics for Research in Education (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini direkabentuk untuk membantu pelajar menggunakan statistik asas dalam penyelidikan pendidikan. Melalui tugas praktikal, pelajar akan mempelajari cara menggunakan prosedur statistik yang sesuai. Disamping itu, cara mengenalpasti masalah dalam analisis data seperti kes ekstrim (outlier), taburan tidak normal dan lain-lain juga akan dibincangkan. Data daripada penyelidikan pendidikan akan digunakan untuk menunjukkan bagaimana teknik statistik diaplikasi, ditafsir dan dilaporkan menurut format APA. Isi kandungan kursus ini termasuk organisasi data, perwakilan secara grafik, ukuran kecenderungan memusat, ukuran kebolehubahan, skala pengukuran, taburan normal, konsep pengujian hipotesis, perbandingan perbezaan antara dua min (sample besar dan kecil), perbandingan perbezaan antara dua varians, jadual kontingensi, pengujian khi kuasa dua, ujian korelasi Pearson, persampelan rawak yang ringkas dan ANOVA satu hala. Secara umum kursus ini merangkumi teknik prosedur deskriptif dan inferensi penting yang digunakan dalam penyelidikan pendidikan. Indeks saiz kesan dan cara meningkatkan kuasa sesuatu prosedur statistik juga akan dibincangkan.

The course is designed to assist students in applying basic statistics for research in education. Through practical assignments, students not only learn how to apply the statistical techniques. In addition, the methods in identifying in the problems in data analysis such as extreme values(outliers), non-normal distribution will be discussed. Data from educational research journals are used to illustrate how the statistical techniques are applied, described and reported using the APA format. The contents cover the organisation of data, graphical representation of data, measurements of variables, central tendency and variability; measurement scales; normal distribution; concept of hypothesis testing, comparison of means (small and large samples), comparison of variances, contingency tables, Chi Square test, Pearson correlation, random sample and one-way ANOVA. In general the course covers the most important descriptive and inferential statistical techniques used in educational research. Effect size indices and statistical power will be discussed.

PQX7007 Analisis Regresi Gunaan (3 Jam Kredit)
PQX7007 Applied Regression Analysis (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini direka bentuk untuk membantu pelajar dalam melaksanakan teknik analisis regresi untuk penyelidikan dalam pendidikan. Melalui tugas praktikal, pelajar bukan sahaja mempelajari cara menerapkan teknik statistik, tetapi juga bagaimana membina model regresi. Isi kandungan meliputi kes-kes khas Model Linear Umum (GLM) seperti regresi linear yang mudah, regresi berganda, model linear, model polinomial, outlier, peramal kategori, ANOVA faktorial, ANCOVA dan regresi logistik. Secara umum kursus ini merangkumi teknik regresi yang paling penting yang digunakan dalam penyelidikan pendidikan. Artikel dari jurnal penyelidikan pendidikan digunakan untuk menggambarkan bagaimana teknik regresi diterapkan dan diterangkan dalam literatur saintifik, dan bagaimana hasilnya boleh dilaporkan dan ditafsirkan

The course is designed to assist students in applying regression analysis techniques for research in education. Through practical assignments, students not only learn how to apply the statistical techniques, but also how to construct a regression model. The contents cover special cases of General Linear Models (GLM) such as simple linear regression, multiple regression, linear models, polynomial models, outliers, categorical predictors, factorial ANOVA, ANCOVA and logistic regression. In general this course covers the most important regression techniques used in educational research. Articles from educational research journals are used to illustrate how the regression techniques are applied and described in the scientific literature, and how the results can be reported and interpreted.

PQX7008 Kaedah Multivariat (3 Jam Kredit)

PQX7008 Multivariate Methods (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini dirangka untuk membantu pelajar dalam menggunakan teknik analisis multivariat bagi penyelidikan dalam pendidikan. Kursus ini bermula dengan kajian / pengenalan kepada konsep asas dari matriks algebra dan perbincangan tentang sifat-sifat taburan normal multivariat. Regresi berganda dikaji semula secara ringkas dan regresi multivariat disebutkan. Seterusnya, kursus ini membincangkan kaedah untuk membandingkan kumpulan kepada beberapa pembolehubah; kaedah untuk ujian bagi perbezaan cara dan covariances akan diperkenalkan. Analisis dan klasifikasi kaedah analisis diskriminan kemudian diperkenalkan. Kursus ini diakhiri dengan perbincangan analisis komponen utama dan analisis faktor.

The course is designed to assist students in applying multivariate on analysis techniques for research in education. The course begins with a review/introduction to basic concepts from matrix algebra and a discussion of the properties of the multivariate normal distribution. Multiple regression is briefly reviewed and multivariate regression is mentioned. Next, this course then discusses methods for comparing groups on several variables; methods for testing for differences of means and covariances will be introduced. Discriminant analysis and classification analysis methods are then introduced. The course concludes with a discussion of principal components analysis and factor analysis.

POD7002 Perkembangan Kurikulum dalam Pendidikan Matematik (3 Jam Kredit)
POD7002 Curriculum Development in Mathematics Education (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini bertumpu kepada proses dalam kurikulum matematik yang berkaitan dengan identifikasi matlamat, pengembangan program, pelaksanaan, dan penilaian. Asas sejarah, falsafah, dan sosiologi bagi reka bentuk dan perancangan kurikulum dalam pendidikan matematik akan dibincangkan. Kursus ini juga akan meneliti kurikulum matematik sekolah rendah dan menengah, dengan penekanan kepada bentuk program masa kini, aliran semasa dalam reka bentuk dan isi kandungan, skop dan susunan, inovasi, dan proses reformasi. Tumpuan adalah kepada usaha mengenal pasti isu dan masalah bagi tujuan penyelidikan.

The course focuses on the development process of mathematics curriculum; particularly that is related to the identification of the goal in mathematics education, development of the programme, its implementation and evaluation. History, philosophy and sociology forms as the basis in the mathematics curriculum design will be discussed. This course also gives students the opportunity to analyze the primary and secondary school mathematics, with the emphases on the structure of the present program, the current trend in the curriculum design and content, scope and organization, innovation and the process of reform. Focus will be given to the identification of issues and challenges for research.

PQX7002 Projek Penyelidikan (12 Jam Kredit)
PQX7002 Research Project (12 Credit Hours)

Sinopsis/Synopsis

Kursus ini memerlukan pelajar meformulasikan masalah kajian dan kerangka konseptual / teori yang berkaitan dalam mana-mana bidang relevan untuk program yang didaftarkan dan menjalankan kajian secara koheren. Pelajar akan menjalankan ulasan literature dan mengaplikasikan kaedah sesuai untuk kutipan data dan analisis. Pelajar akan di selia oleh seorang penyelia sepanjang proses ini. Satu laporan penyelidikan akan di serahkan untuk penilaian.

This course requires the student to formulate a research problem and the related conceptual / theoretical frameworks in any relevant field for the programme registered for and carry out the research coherently. Students would conduct a comprehensive review of the relevant literature, and use appropriate methods of data collection and analysis. Students would be supervised by a lecturer throughout the process. A research report will be submitted for examination.

1. Jenis Program

Program secara Kursus dan Penyelidikan iaitu program secara gabungan perkuliahan dan penyelidikan yang membawa kepada penghasilan disertasi.

Programme Type

Programme by coursework and research is a program which combines lectures and research towards the production of a dissertation.

2. Syarat Kemasukan Entry Requirement

Kelayakan masuk untuk mengikuti program Sarjana Pendidikan (Pendidikan Sains) adalah seperti berikut:

Entry requirements for the programme Master of Education (Science Education) is as follows:

- i. Ijazah Sarjana Muda Sains dengan Pendidikan dengan PNGK sekurang-kurangnya 3.00 atau yang setaraf dengannya dalam pengkhususan Sains; **ATAU**
Bachelor of Science in Education Degree with CGPA of at least 3.0 and or its equivalent in science specialization; OR
- ii. Ijazah Sarjana Muda berasaskan Sains dengan PNGK sekurang-kurangnya 3.00 atau yang setaraf dengannya; **DAN**
Bachelor of Science Degree with CGPA of at least 3.0 or its equivalent; AND
 - a. Diploma Pendidikan pasca ijazah dengan PNGK 3.00; **ATAU**
Post-graduate diploma in education with CGPA of at least 3.0; OR
 - b. Kelayakan perguruan yang diiktiraf oleh Universiti; **ATAU**
Teaching qualifications recognized by the University; OR
 - c. Pengalaman mengajar tidak kurang daripada satu tahun yang berkaitan dari institusi pendidikan yang diiktiraf oleh Senat; **ATAU**
Teaching experience of at least one relevant year from an educational institution recognized by the Senate; OR
 - d. Kelayakan ikhtisas dari badan profesional yang diiktiraf; **ATAU**
Eligibility criteria from a recognized professional body; OR
 - e. Mempunyai kelulusan lain yang diiktiraf setaraf dengannya oleh Kerajaan Malaysia dan diperakukan oleh Senat Universiti Malaya.
Has other qualifications recognized equivalent to it by the Government of Malaysia and approved by the Senate of the University of Malaya

Tempoh Maksimum : 8 Semester

Duration of study

Minimum Duration :3 semester
Maximum Duration :8 semester

4. Matlamat Program

Untuk menghasilkan graduan yang dinamik dan reflektif yang boleh mengaplikasi pengetahuan praktikal, teori pendidikan, penyelidikan terkini dan pengetahuan Sains untuk menyelesaikan masalah dalam menghadapi cabaran dan keperluan diperingkat nasional dan global dalam pendidikan sains.

Programme Goals

To produce graduates that is dynamic and reflektive who can apply practical knowledge, educational theories, current research and science knowledge to solve problems in other to face challenges and needs at national and global levels in science education.

5. Hasil Pembelajaran Program Program Learning Outcomes

Di akhir program, pelajar dapat;

At the end of the programme, students will be able to;

Domain MQF	Hasil Pembelajaran
PO1	Menguasai pengetahuan tentang teori, pedagogi dan perkembangan terkini dalam pendidikan sains. <i>Master knowledge about theory, pedagogy and recent development in science education.</i>
PO2	Mengaplikasi pelbagai teori pendidikan dan kemahiran saintifik dalam pengajaran dan pembelajaran sains serta menjalankan penyelidikan yang relevan dengan cekap dan berkesan <i>Apply various educational theories and scientific skills in teaching and learning sains and carry out relevant research efficiently and effectively.</i>
PO3	Mengamalkan tanggungjawab sosial terhadap isu kontemporari yang berkaitan dengan bidang dalam pendidikan sains dalam arena tempatan dan antarabangsa. <i>Practice social responsibility towards contemporary issues on areas in science education in the local and international arena.</i>
PO4	Mengamalkan nilai murni, sikap positif, dan etika profesionalisme dalam bidang perguruan dan kehidupan seharian. <i>Practice noble values, positive attitude, and professional ethics in the teaching field and daily life.</i>
PO5	Mengaplikasikan pengetahuan sains dan kemahiran saintifik untuk memperkukuhkan komunikasi, meningkatkan kepimpinan dan mengembangkan keupayaan untuk bekerja berpasukan. <i>Apply science knowledge and scientific skills to strengthen communication, improve leadership and expand the ability to work in a team.</i>
PO6	Menganalisis teori, polisi dan isu kontemporari secara kritis dan menghasilkan idea inovatif dan kreatif berkaitan pengajaran dan pembelajaran yang menyumbang kepada bidang Pendidikan Sains. <i>Analyse theory, policy and contemporary issue critically and to produce innovative and creative ideas in teaching and learning which contribute to the Science Education field.</i>
PO7	Melibatkan diri dalam pembelajaran sepanjang hayat dan mengurus maklumat yang berkaitan dengan Pendidikan Sains secara berkesan. <i>Involve in life long learning and manage relevant information in Science Education effectively.</i>

6. Struktur Program

Struktur Program Sarjana Pendidikan (Pendidikan Sains) berasaskan pendekatan bersifat kontemporari untuk melahirkan graduan pendidikan sains yang relevan dan berwibawa. Kandungan kurikulum direkabentuk berdasarkan perkembangan ilmu pendidikan daripada perspektif perkhidmatan dan pengajaran yang sejajar dengan Falsafah Pendidikan Kebangsaan, Wawasan Negara serta Pelan Transformasi Negara 2013-2025.

Program ini merangkumi Empat Puluh Lima (45) jam kredit yang merangkumi Sembilan (9) jam kredit bagi kursus teras, Enam (6) jam kredit bagi kursus elektif dan Tiga Puluh (30) jam kredit bagi disertasi yang melibatkan aktiviti Kuliah, perbincangan, *e-learning*, forum, projek, pembelajaran teradun (*blended learning*).

Programme Structure

The structure of the Master of Education (Science Education) Programme is based on a contemporary approach to produce relevant and credible science education graduates. Curriculum content is designed based on the development of education from the perspective of service and teaching in line with the National Philosophy of Education, National Vision and National Transformational Plan 2013-2025.

The programme includes Forty five (45) credit hours inclusive of nine (9) credit hours for core courses, six (6) credit hours for elective courses and thirty (30) credit hours for dissertation which involve lectures, discussions, e-learning, forum, project, blended learning.

UNIVERSITY OF MALAYA (MASTER'S DEGREE) REGULATIONS 2019**

1. Pendaftaran Kursus / Course Registration

- (1) Pendaftaran kursus dilakukan dalam tempoh selama dua (2) minggu dari tarikh permulaan semester.

Course registration must be completed within two (2) weeks from the date the semester begins

- (2) Seseorang calon hendaklah mendaftar sekurang-kurangnya tiga (3) kredit kursus termasuk kredit yang diperuntukan bagi penyelidikan pada mana-mana semester melainkan ia diluluskan penarikan diri daripada semester berkenaan

The candidate must register for at least three (3) credits hours including credit allocated for research in any given semester unless withdrawal from that semester has been approved.

2. Penyeliaan / Supervision

Pelantikan penyelia dilakukan tidak lewat daripada semester pertama pengajian.

Appointment of supervisor must be done not later than the first semester of study.

3. Ketetapan Bidang Penyelidikan / Determination of Research Area

Ketetapan bidang bagi disertasi hendaklah dilakukan sebelum calon memulakan penyelidikannya.

Determination of the research area must be carried out before the candidate begins his/her research.

4. Pembentangan Seminar 1 dan Seminar 2

Proposal Defence and Candidature Defence Presentation

Membentangkan cadangan penyelidikan dalam Proposal Defence;

Present your research proposal at Proposal Defence;

Membentangkan kemajuan penyelidikan dalam Candidature Defence;

Present your research progress at Candidature Defence;

5. Penyerahan / Submission

- (1) Tajuk disertasi hendaklah dikemukakan kepada Fakulti untuk kelulusan semasa calon memberi notis untuk penyerahan disertasinya.

The dissertation title must be submitted to the Faculty for approval when the candidate gives notice for the submission of his/her dissertation

- (2) Calon hendaklah menyerahkan disertasi untuk peperiksaan dalam tempoh pencalonannya. Tempoh yang diambil untuk pemeriksaan disertasi dan apa-apa tempoh pembetulan atau kajian lanjut yang diperlukan oleh Jawatankuasa Pemeriksa tidak dianggap sebagai sebahagian daripada tempoh maksimum pencalonan calon.

The candidate shall submit his/her dissertation for examination within the candidacy period. The time taken for the examination of dissertation and any period of correction or further review required by the Examination Committee is not considered as part of the maximum candidature period.

SINOPSIS KURSUS / COURSE SYNOPSIS

POC7001 Kaedah Penyelidikan dalam Pendidikan Sains (3 Jam Kredit) **POC7001 Research Methods in Science Education (3 Credit Hours)**

Sinopsis/Synopsis

Kursus ini bertujuan untuk memberi pendedahan kepada pelajar tentang ciri, skop dan pelbagai aspek penyelidikan dalam pendidikan sains serta menganalisis kelebihan dan kelemahan bagi setiap satu. Bidang penyelidikan yang terkini dalam pendidikan sains juga akan diulas. Kajian kuantitatif dan kualitatif tertentu akan dipilih untuk analisis secara kritis agar membolehkan pelajar memperoleh kefahaman yang lebih mendalam tentang reka bentuk dan metodologi penyelidikan. Pelajar juga berpeluang untuk merekabentuk suatu projek mini dan menjalankan projek tersebut di lapangan sebenar.

The course is intended to expose students to the nature, scope and various aspects of research in science education, as well as the strengths and weaknesses of each of them. Areas of recent research in science education will be reviewed, and selected quantitative and qualitative studies, will be critically analysed to enable the students to have a deeper understanding of research designs and methodologies. Students will also have the opportunity to design a mini research project and conduct the project in the actual setting.

POC7002 Kajian Kurikulum dalam Pendidikan Sains (3 Jam Kredit) **POC7002 Curriculum Studies in Science Education (3 Credit Hours)**

Sinopsis/Synopsis

Tujuan kursus ini merangkumi pemeriksaan secara kritis semua aspek dalam perkembangan kurikulum sains di Malaysia dan aspek berkaitan visi pendidikan. Rekabentuk, pelaksanaan dan penilaian kurikulum sains akan di bandingkan dengan pelbagai negara. Perbincangan lanjut tentang kemahiran abada ke -21 dan pemetaan kemahiran yang di perlukan dalam dunia yang kompleks dan berhubung. Fokus akan di berikan kepada rekabentuk instruksi dan kepentingannya.

The course will include a critical examination in the development of the Malaysian science curriculum and aspects pertaining to the educational vision. The design, implementation and assessment of science curricula will be cross compared with various nations. There would be further discussion of the 21st century skills and the mapping of the skills needed in a complex and connected world. There would be a focus on various instructional designs and its significance.

POC7003 Isu Kontemporari dalam Pendidikan Sains (3 Jam Kredit)**POC7003 Contemporary issues in Science Education (3 Credit Hours)**

Sinopsis/Synopsis

Kursus ini akan meneliti polisi kini yang mempengaruhi pendidikan sains dalam pelbagai situasi. Pelbagai strategi yang sesuai akan digunakan untuk menentu dan membangun amalan terbaik yang mampu menangani cabaran yang wujud daripada isu kontemporari berkaitan dengan pendidikan sains. Kursus ini juga akan meneliti perubahan dalam kurikulum sains peringkat nasional dan antarabangsa dan mengaitkan dengan teori yang mendasari amalan dalam pendidikan sains masakini. Pelajar juga berpeluang untuk membentuk pemahaman terhadap isu kontemporari ini dan kesannya keatas persekitaran pembelajaran sains dan mengutarakan persekitaran pembelajaran yang berkesan dalam pelbagai konteks.

This course examines current policies that affect science education across various settings. Various strategies are used to identify and develop best practices that respond to challenges arising from contemporary issues related to science education. This course also reviews changes in national and international science curriculum and examines the theoretical underpinnings of current science education practices. Students will have the opportunity to develop an understanding of the contemporary issues and their effects on science learning environments and propose effective learning environments in various contexts..

POC7004 Pembelajaran dan Kognisi dalam Pendidikan Sains (3 Jam Kredit)**POC7004 Learning and Cognition in Science Education (3 Credit Hours)**

Sinopsis/Synopsis

Dapatan penyelidikan dari masa awal sehingga masa terkini tentang teori-teori konstruktivisme kognitif dan social, teori pemprosesan maklumat, teori berasaskan otak dan neurokognisi berkaitan dengan bagaimana manusia belajar menjadi fokus kursus ini. Kursus ini akan memberi latar belakang yang mendalam tentang prinsip-prinsip spesifik teori-teori berkaitan perkembangan minda dan implikasinya untuk mempertingkatkan pendidikan sains. Dapatan terkini tentang proses mental kognitif seperti pemindahan, visualisasi, perwakilan dan model mental, analogi, metakognisi, penyelesaian masalah, perubahan konseptual dan penaakulan akan dibincangkan dalam aspek bagaimana semua ini membawa impak kepada pengajaran dan pembelajaran sains. Contoh-contoh berkaitan bagaimana teori dan penyelidikan boleh digunakan dalam amalan dan sebaliknya akan dibincangkan. Pelajar juga akan memperoleh pengalaman melalui kajian kognisi empirical dalam persekitaran bilik darjah.

This course focuses on the early beginnings to the latest findings in relation to influential theories of cognitive and social constructivism, information processing theories, brain based theories and neurocognition in relation to how people learn. This course will serve as an enriching theoretical background and will provide important insights on theoretical underpinnings and specific principles of these learning theories into the workings of the developing mind and their implications for improving science instruction. Recent findings on the mental cognitive processes of transfer, visualisations, mental representations and models, analogy, metacognition, problem solving, conceptual change and reasoning, will be discussed as to how they impact science teaching and learning. Examples that elucidate both how theory and research inform practice and how practice informs research will be discussed. The culminating experience for the students will include an empirical study of cognition in a classroom setting.

POC7005 Pentaksiran dalam Pendidikan Sains (3 Jam Kredit)

POC7005 Assessment in Science Education (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini membincangkan teori dan prinsip pentaksiran dalam sains dan menganalisis secara kritis tentang pentaksiran dari segi objektif, kaedah, strategi dan konstruk dalam kurikulum sains. Kursus ini juga memberi pendedahan dan membincangkan secara kritikal berkaitan jenis-jenis pentaksiran dalam sains dan isu-isu yang berkaitan pentaksiran dalam pendidikan sains.

PQX7001 Statistik untuk Penyelidikan dalam Pendidikan (3 Jam Kredit)
PQX7001 Statistics for Research in Education (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini direkabentuk untuk membantu pelajar menggunakan statistik asas dalam penyelidikan pendidikan. Melalui tugas praktikal, pelajar akan mempelajari cara menggunakan prosedur statistik yang sesuai. Disamping itu, cara mengenalpasti masalah dalam analisis data seperti kes ekstrim (outlier), taburan tidak normal dan lain-lain juga akan dibincangkan. Data daripada penyelidikan pendidikan akan digunakan untuk menunjukkan bagaimana teknik statistik diaplikasi, ditafsir dan dilaporkan menurut format APA. Isi kandungan kursus ini termasuk organisasi data, perwakilan secara grafik, ukuran kecenderungan memusat, ukuran kebolehubahan, skala pengukuran, taburan normal, konsep pengujian hipotesis, perbandingan perbezaan antara dua min (sample besar dan kecil), perbandingan perbezaan antara dua varians, jadual kontingensi, pengujian khi kuasa dua, ujian korelasi Pearson, persampelan rawak yang ringkas dan ANOVA satu hala. Secara umum kursus ini merangkumi teknik prosedur deskriptif dan inferensi penting yang digunakan dalam penyelidikan pendidikan. Indeks saiz kesan dan cara meningkatkan kuasa sesuatu prosedur statistik juga akan dibincangkan.

The course is designed to assist students in applying basic statistics for research in education. Through practical assignments, students not only learn how to apply the statistical techniques. In addition, the methods in identifying in the problems in data analysis such as extreme values(outliers), non-normal distribution will be discussed. Data from educational research journals are used to illustrate how the statistical techniques are applied, described and reported using the APA format. The contents cover the organisation of data, graphical representation of data, measurements of variables, central tendency and variability; measurement scales; normal distribution; concept of hypothesis testing, comparison of means (small and large samples), comparison of variances, contingency tables, Chi Square test, Pearson correlation, random sample and one-way ANOVA. In general the course covers the most important descriptive and inferential statistical techniques used in educational research. Effect size indices and statistical power will be discussed.

PQC7004 Pendidikan Alam Sekitar dan Kelestarian (3 Jam Kredit)
PQC7004 Environmental Education and Sustainability (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini memperkenalkan konsep-konsep utama dalam pendidikan, alam sekitar dan kemampanan (EES) sebagai laluan cara untuk memahami isu-isu dan cabaran alam sekitar dan mengkaji hubungan di antaranya. Tumpuan juga akan diberikan kepada strategi dan kaedah pengajaran dalam pendidikan alam sekitar seperti pemikiran dan pembelajaran antara disiplin pemikiran, pengajaran 'Problem-based'. Pelajar juga akan diperlukan untuk menjalankan suatu mini penyelidikan tentang kelestarian alam sekitar.

This course introduces key concepts on education, environment and sustainability (EES) as a path way to understand environmental issues and challenges and examines the relationship between each. This course also emphasizes a wide array of instructional strategies and teaching methods such as inter-disciplinary thinking and learning, problem-based learning and etc. Students would also be required to conduct a simple research on environment sustainability.

POX 7002 Disertasi (30 jam kredit)
POX 7002 Dissertation (30 credit hours)

Kursus ini memerlukan pelajar meformulasikan masalah kajian dan kerangka konseptual/ teori yang berkaitan dalam mana-mana bidang relevan untuk program yang didaftarkan dan menjalankan kajian secara koheren. Pelajar akan menjalankan ulasan literatur dan mengaplikasikan kaedah sesuai untuk kutipan data dan analisis. Pelajar akan di selia oleh seorang penyelia sepanjang proses ini. Satu disertasi akan di serahkan untuk penilaian.

This course requires the student to formulate a research problem and the related conceptual/ theoretical frameworks in any relevant field for the programme registered for and carry out the research coherently. Students would conduct a comprehensive review of the relevant literature, and use appropriate methods of data collection and analysis. Students would be supervised by a lecturer throughout the process. A dissertation will be submitted for examination.

4. **Matlamat Program**

Untuk menghasilkan graduan dalam bidang pendidikan sains dengan teknologi maklumat dan komunikasi yang profesional, beretika, berpemikiran global dan berinovasi bagi menghadapi perkembangan pesat sains dan teknologi masa kini.

Programme Aim

To produce professional graduates in the field of science education with information technology and communication who are ethical, global-minded and innovative in the face of the rapid development of science and technology today.

5. **Hasil Pembelajaran Program**

Program Learning Outcomes

Di akhir program, pelajar dapat;

At the end of the programme, students will be able to;

Domain MQF	Hasil Pembelajaran Learning Outcomes
PO1	Menguasai pengetahuan tentang aplikasi Teknologi Maklumat dalam pendidikan sains dan perkembangan terkini dalam pengajaran dan pembelajaran sains berbantuan Teknologi Maklumat <i>Master knowledge about the application of Information Technology in science education and the latest developments in the teaching and learning of science with the help of information technology.</i>
PO2	Mengaplikasi pelbagai teori pendidikan dalam pengajaran dan pembelajaran sains berlandaskan Teknologi Maklumat serta menjalankan penyelidikan yang relevan dengan cekap dan berkesan. <i>Apply various educational theories in teaching and learning science based on Information Technology and conduct relevant and efficient research.</i>
PO3	Mangamalkan tanggungjawab sosial dalam penggunaan Teknologi Maklumat dalam pendidikan sains dalam arena tempatan dan antarabangsa. <i>Practise social responsibility in the use of Information Technology in science education in the local and international arena.</i>
PO4	Mengamalkan nilai murni, sikap positif, dan etika profesionalisme dalam bidang perguruan dan kehidupan seharian. <i>Practise values, positive attitudes, and ethics in professionalism for teaching and everyday life.</i>
PO5	Menggunakan pengetahuan sains dan teknologi untuk memperkukuhkan komunikasi, meningkatkan kepimpinan dan mengembangkan keupayaan untuk bekerja berpasukan. <i>Use science and technology knowledge to strengthen communication improve leadership and develop the ability to work in teams.</i>
PO6	Menggunakan kemahiran berfikir dalam menyelesaikan masalah bagi meningkatkan kualiti Pendidikan Sains dengan Teknologi Maklumat. <i>Use thinking skills in problem solving to improve the quality of science education with Information Technology.</i>
PO7	Meningkatkan komitmen terhadap pembelajaran sepanjang hayat dan menguruskan maklumat dalam pendidikan sains. <i>Increase commitment to lifelong learning and to effectively manage information in science education.</i>

6. **Struktur Program**

Struktur Program Sarjana Pendidikan Sains dengan Teknologi Maklumat berasaskan pendekatan bersifat kontemporari untuk melahirkan graduan pendidikan sains yang relevan dan berwibawa. Kandungan kurikulum direkabentuk berdasarkan perkembangan ilmu pendidikan daripada perspektif perkhidmatan dan pengajaran yang sejajar dengan Falsafah Pendidikan Kebangsaan, Wawasan Negara serta Pelan Transformasi Negara 2013-2025.

Program ini merangkumi Empat Puluh Dua (42) jam kredit yang merangkumi Dua Belas (12) jam kredit bagi kursus teras, Lapan Belas (18) jam kredit bagi kursus elektif dan Dua Belas (12) jam kredit bagi laporan penyelidikan yang melibatkan aktiviti Kuliah, perbincangan, e-learning, forum, projek, pembelajaran teradun (*blended learning*).

Programme Structure

The structure of the Master of Science Education with Information Technology programme is based on a contemporary approach to produce relevant and credible science education graduates. Curriculum content is designed based on the development of education from the perspective of services and teaching in line with the National Philosophy of Education, National Vision and National Transformation Plan 2013-2025.

The program includes Forty-two (42) credit hours including Twelve (12) credit hours for core courses, Eighteen (18) credit hours for elective courses and Twelve (12) credit hours for research reports involving Lecture, discussions, e-learning, forums, projects, blended learning.

SINOPSIS KURSUS / COURSE SYNOPSIS

PQC 7001 Teknologi Maklumat dan Komunikasi dalam Pendidikan Sains (3 Jam Kredit) **PQC 7001 Information Communication and Technology in Science Education (3 Credit Hours)**

Sinopsis/Synopsis

Fokus kursus ini adalah untuk membekalkan pelajar kepada perspektif pedagogi, teori, pengalaman, dan kritikal dalam penggunaan teknologi maklumat dan komunikasi (TMK) dalam pelbagai konteks pendidikan, khususnya dalam pengajaran dan pembelajaran sains. Ini membolehkan pelajar untuk mendalami pengetahuan dan pemahaman mereka tentang kebarangkalian pedagogi, teknologi dan pengetahuan kandungan (TPACK). Kursus ini juga bertujuan membolehkan pelajar membuat penilaian dan mengadaptasi teknologi baru dan teknologi yang baru muncul dalam merekabentuk pengajaran sains yang berkesan.

The focus of this course is to equip students with the pedagogical, theoretical, experiential, and critical perspectives on information communications technology as it is applied in a variety of educational contexts, particularly in the teaching and learning of science. This will promote students to deepen their understanding of technological, pedagogical, content knowledge (TPACK) framework. This course also aims to enable students to evaluate and adapt new and emerging technologies in designing lessons for effective science instruction.

PQC 7002 Pembelajaran Sains dalam Era Teknologi Terkini (3 Jam Kredit) **PQC 7002 Learning science in the age of new and emerging technologies (3 Credit Hours)**

Sinopsis/Synopsis

Kursus ini bertujuan untuk memberi pendedahan kepada teknologi baru dan memunculkan termasuk alat yang menjangkau sistem pengurusan yang mampu mewujudkan persekitaran pembelajaran bagi kegunaan sendiri mahupun perangkaan. Alat-alat ini termasuk cara berkomunikasi dan perangkaan; berinteraksi dalam persekitaran imersif, melibatkan diri dalam simulasi dan permainan; berkongsi bahan sumber; memantapkan bahan kandungan yang dalam bentuk imej, audio dan video; dan alat berkolaborasi. Pelajar akan terlibat secara langsung dalam merekabentuk aktiviti pembelajaran sains yang sebenar dengan mengintegrasikan teknologi yang memunculkan, disamping memastikan aktiviti tersebut berasaskan kepada pedagogi, amalan dan kaedah penyelidikan yang betul.

The course is intended to expose students to new and emerging technologies that include tools beyond a single learning management system into creating personal and networked learning environments. These tools include, but are not limited to, means of networking and communication; interacting in immersive environments; engaging in simulations and games; sharing resources; consolidating images, audio and video content; and collaborating tools. Students will engage in designing authentic science learning activities that incorporate emerging technologies, while basing their activities on sound pedagogy, practice and research methods.

Sinopsis/Synopsis

Kursus ini membincangkan teori-teori dan prinsip-prinsip penilaian dalam bidang sains dan menganalisis secara kritikal penilaian dari segi objektif, kaedah, strategi dan membina dalam kurikulum sains. Kursus ini juga melibatkan pelajar untuk berbincang mengenai reformasi penilaian (sumatif untuk formatif) dan isu-isu berkaitan kesahihan, kebolehpercayaan, etika dan kesaksamaan dalam era TMK. Pelajar akan didedahkan kepada alat IT mudah untuk merekabentuk tugasan untuk mentaksir kemahiran yang kompleks.

This course discusses the theories and principles of assessment in science and analyzes critically the assessments in terms of objectives, methods, strategies and constructs in the science curriculum. The course also engages students to discuss about assessment reforms (summative to formative) and issues regarding validity, reliability, ethics and equality in the era of ICT. Students will be exposed to simple IT tools to design tasks for assessing complex skills.

POC 7001 Kaedah Penyelidikan dalam Pendidikan Sains (3 Jam Kredit)

POC 7001 Research Methods in Science Education (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini bertujuan untuk memberi pendedahan kepada pelajar tentang ciri, skop dan pelbagai aspek penyelidikan dalam pendidikan sains serta menganalisis kelebihan dan kelemahan bagi setiap satu. Bidang penyelidikan yang terkini dalam pendidikan sains juga akan diulas. Kajian kuantitatif dan kualitatif tertentu akan dipilih untuk analisis secara kritis agar membolehkan pelajar memperoleh kefahaman yang lebih mendalam tentang reka bentuk dan metodologi penyelidikan. Pelajar juga berpeluang untuk merekabentuk suatu projek mini dan menjalankan projek tersebut di lapangan sebenar.

The course is intended to expose students to the nature, scope and various aspects of research in science education, as well as the strengths and weaknesses of each of them. Areas of recent research in science education will be reviewed, and selected quantitative and qualitative studies, will be critically analysed to enable the students to have a deeper understanding of research designs and methodologies. Students will also have the opportunity to design a mini research project and conduct the project in the actual setting.

POC 7002 Kajian Kurikulum dalam Pendidikan Sains (3 Jam Kredit)
POC 7002 Curriculum Studies in Science Education (3 Credit Hours)

Sinopsis/Synopsis

Tujuan kursus ini merangkumi pemeriksaan secara kritis semua aspek dalam perkembangan kurikulum sains di Malaysia dan aspek berkaitan visi pendidikan. Rekabentuk, pelaksanaan dan penilaian kurikulum sains akan di bandingkan dengan pelbagai negara. Perbincangan lanjut tentang kemahiran abada ke -21 dan pemetaan kemahiran yang di perlukan dalam dunia yang kompleks dan berhubung. Fokus akan di berikan kepada rekabentuk instruksi dan kepentingannya.

The course will include a critical examination in the development of the Malaysian science curriculum and aspects pertaining to the educational vision. The design, implementation and assessment of science curricula will be cross compared with various nations. There would be further discussion of the 21st century skills and the mapping of the skills needed in a complex and connected world. There would be a focus on various instructional designs and its significance.

POC 7004 Pembelajaran dan Kognisi dalam Pendidikan Sains (3 Jam Kredit)
POC 7004 Learning and Cognition in Science Education (3 Credit Hours)

Sinopsis/Synopsis

Dapatan penyelidikan dari masa awal sehingga masa terkini tentang teori-teori konstruktivisme kognitif dan social, teori pemrosesan maklumat, teori berasaskan otak dan neurokognisi berkaitan dengan bagaimana manusia belajar menjadi fokus kursus ini. Kursus ini akan memberi latar belakang yang mendalam tentang prinsip-prinsip spesifik teori-teori berkaitan perkembangan minda dan implikasinya untuk mempertingkatkan pendidikan sains. Dapatan terkini tentang proses mental kognitif seperti pemindahan, visualisasi, perwakilan dan model mental, analogi, metakognisi, penyelesaian masalah, perubahan konseptual dan penaakulan akan dibincangkan dalam aspek bagaimana semua ini membawa impak kepada pengajaran dan pembelajaran sains. Contoh-contoh berkaitan bagaimana teori dan penyelidikan boleh digunakan dalam amalan dan sebaliknya akan dibincangkan. Pelajar juga akan memperoleh pengalaman melalui kajian kognisi empirical dalam persekitaran bilik darjah.

This course focuses on the early beginnings to the latest findings in relation to influential theories of cognitive and social constructivism, information processing theories, brain based theories and neurocognition in relation to how people learn. This course will serve as an enriching theoretical background and will provide important insights on theoretical underpinnings and specific principles of these learning theories into the workings of the developing mind and their implications for improving science instruction. Recent findings on the mental cognitive processes of transfer, visualisations, mental representations and models, analogy, metacognition, problem solving, conceptual change and reasoning, will be discussed as to how they impact science teaching and learning. Examples that elucidate both how theory and research inform practice and how practice informs research will be discussed. The culminating experience for the students will include an empirical study of cognition in a classroom setting.

PQD7004 Produksi Multimedia dalam Pengajaran (3 Jam Kredit)
PQD 7004 Production of Multimedia in Teaching (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini bertujuan memberi pengalaman kepada pelajar membangunkan perisian multimedia pendidikan yang berasaskan kepada gabungan teori dan kemahiran teknikal yang telah disentuh dalam kursus ini. Piawaian dan keserasian setiap komponen multimedia diberi penekanan. Aspek antara muka perisian; format akhir pakej perisian pendidikan; dan penilaian perisian yang telah dibangunkan juga akan disentuh.

This course aims to give students the experience of developing educational multimedia software based on a combination of theory and technical skills that have been covered in this course. Standards and compatibility of each multimedia component emphasized. Aspects of the software interface, end format software package for education, and evaluation of software that has been developed will also be touched.

PQX7001 Statistik untuk Penyelidikan dalam Pendidikan (3 Jam Kredit)
PQX7001 Statistics for Research in Education (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini direkabentuk untuk membantu pelajar menggunakan statistik asas dalam penyelidikan pendidikan. Melalui tugas praktikal, pelajar akan mempelajari cara menggunakan prosedur statistik yang sesuai. Disamping itu, cara mengenalpasti masalah dalam analisis data seperti kes ekstrim (outlier), taburan tidak normal dan lain-lain juga akan dibincangkan. Data daripada penyelidikan pendidikan akan digunakan untuk menunjukkan bagaimana teknik statistik diaplikasi, ditafsir dan dilaporkan menurut format APA. Isi kandungan kursus ini termasuk organisasi data, perwakilan secara grafik, ukuran kecenderungan memusat, ukuran kebolehubahan, skala pengukuran, taburan normal, konsep pengujian hipotesis, perbandingan perbezaan antara dua min (sample besar dan kecil), perbandingan perbezaan antara dua varians, jadual

kontingensi, pengujian khi kuasa dua, ujian korelasi Pearson, persampelan rawak yang ringkas dan ANOVA satu hala. Secara umum kursus ini merangkumi teknik prosedur deskriptif dan inferensi penting yang digunakan dalam penyelidikan pendidikan. Indeks saiz kesan dan cara meningkatkan kuasa sesuatu prosedur statistik juga akan dibincangkan.

The course is designed to assist students in applying basic statistics for research in education. Through practical assignments, students not only learn how to apply the statistical techniques. In addition, the methods in identifying in the problems in data analysis such as extreme values(outliers), non-normal distribution will be discussed. Data from educational research journals are used to illustrate how the statistical techniques are applied, described and reported using the APA format. The contents cover the organisation of data, graphical representation of data, measurements of variables, central tendency and variability; measurement scales; normal distribution; concept of hypothesis testing, comparison of means (small and large samples), comparison of variances, contingency tables, Chi Square test, Pearson correlation, random sample and one-way ANOVA. In general the course covers the most important descriptive and inferential statistical techniques used in educational research. Effect size indices and statistical power will be discussed.

PQX7002 Projek Penyelidikan (12 Jam Kredit)
PQX7002 Research Project (12 Credit Hours)

Sinopsis/Synopsis

Kursus ini memerlukan pelajar meformulasikan masalah kajian dan kerangka konseptual / teori yang berkaitan dalam mana-mana bidang relevan untuk program yang didaftarkan dan menjalankan kajian secara koheren. Pelajar akan menjalankan ulasan literature dan mengaplikasikan kaedah sesuai untuk kutipan data dan analisis. Pelajar akan di selia oleh seorang penyelia sepanjang proses ini. Satu laporan penyelidikan akan di serahkan untuk penilaian.

This course requires the student to formulate a research problem and the related conceptual / theoretical frameworks in any relevant field for the programme registered for and carry out the research coherently. Students would conduct a comprehensive review of the relevant literature, and use appropriate methods of data collection and analysis. Students would be supervised by a lecturer throughout the process. A research report will be submitted for examination.

6. Struktur Program

Struktur Program Sarjana Pendidikan (Pendidikan Jasmani dan Kesihatan) berasaskan pendekatan bersifat kontemporari untuk melahirkan pemimpin dan pentadbir yang cemerlang. Kandungan kurikulum direkabentuk berdasarkan perkembangan ilmu pendidikan daripada perspektif perkhidmatan dan pengajaran yang sejajar dengan Falsafah Pendidikan Kebangsaan, Wawasan Negara, Pelan Transformasi Negara serta Pelan Pembangunan Pendidikan Malaysia (Pendidikan Tinggi).

Program ini merangkumi Lima Puluh (50) jam kredit yang merangkumi Sembilan (9) jam kredit bagi untuk Kursus Teras Program (Wajib Bidang Pengkhususan), Enam (6) jam kredit bagi Kursus Elektif Bidang Pengkhususan dan Tiga Puluh Lima (35) jam kredit bagi disertasi yang melibatkan aktiviti kuliah, tugas, perbincangan, pembentangan, penyelidikan, lawatan dan pendekatan yang berasaskan teknologi.

Programme Structure

Master of Education (Physical Education and Health) Program structure is based on a contemporary approach to producing outstanding leaders and administrators. Curriculum content is designed based on the development of education from the perspective of services and teaching in line with the National Philosophy of Education, National Vision, National Transformation Plan and Malaysian Education Development Plan (Higher Education).

The program includes Fifty (50) credit hours including Nine (9) credit hours for the Program Core Course (Required for Specialization), Six (6) credit hours for Specialized Elective Courses and Thirty five (35) credit hours for dissertations involving lectures, assignments, discussions, presentations, research, visits and technology-based approaches.

Membentangkan kemajuan penyelidikan dalam Candidature Defence;

Present your research progress at Candidature Defence;

5. Penyerahan / Submission

- (1) Tajuk disertasi hendaklah dikemukakan kepada Fakulti untuk kelulusan semasa calon memberi notis untuk penyerahan disertasinya.

The dissertation title must be submitted to the Faculty for approval when the candidate gives notice for the submission of his/her dissertation

- (2) Calon hendaklah menyerahkan disertasi untuk peperiksaan dalam tempoh pencalonannya. Tempoh yang diambil untuk pemeriksaan disertasi dan apa-apa tempoh pembetulan atau kajian lanjut yang diperlukan oleh Jawatankuasa Pemeriksa tidak dianggap sebagai sebahagian daripada tempoh maksimum pencalonan calon.

The candidate shall submit his/her dissertation for examination within the candidacy period. The time taken for the examination of dissertation and any period of correction or further review required by the Examination Committee is not considered as part of the maximum candidature period.

SINOPSIS KURSUS / COURSE SYNOPSIS

POE7001 Kaedah Penyelidikan dalam Pendidikan Jasmani dan Kesihatan (3 jam Kredit) **POE7001 Research Methodology in Physical Education and Health (3 credits hours)**

Sinopsis/Synopsis

Kursus ini akan memperkenalkan pelajar kepada masalah, isu dan proses dalam penyelidikan yang berkaitan dengan Pendidikan Jasmani dan Kesihatan. Antara topik yang akan di bincangkan ialah teori dan aplikasinya dalam bidang penyelidikan. Perbincangan akan dipusatkan kepada keadah, rekabentuk penyelidikan, kaedah pemilihan sampel, pengumpulan data dalam Pendidikan Jasmani dan Kesihatan. Kursus ini juga akan melibatkan pelajar menganalisis secara kritis atikel penyelidikan dalam Pendidikan Jasmani dan Kesihatan.

The course will introduce the students to problems, issues and the process in research in physical and health education. The topics that will be discussed are application of theory in research. Discussion will be focused towards methodology, research design, data collection in physical and health education. The students will analyse critically, articles in physical and health education.

POE7003 Pengukuran dan Penilaian dalam Pendidikan Jasmani dan Kesihatan (3 jam Kredit)
POE7003 Measurement and Evaluation in Physical Education and Health (3 Credits hours)

Sinopsis/Synopsis

Kursus ini akan mendedahkan pelajar tentang konsep dan prinsip dalam pengukuran. Pelajar juga akan didedahkan kepada amali dan protokol pengukuran dalam pendidikan jasmani dan kesihatan. Topik yang akan dibincangkan termasuk penilaian dalam domain kognitif, psikomotor dan afektif. Pelajar juga akan didedahkan kepada beberapa instrumen pengukuran serta hubungkait kurikulum dan penilaian dalam bidang pendidikan jasmani dan kesihatan

The course will expose the students on the definition, concepts and principles in measurement. The students will be introduced to practical and various protocol needed to undertake measurement. The topics that will be discussed include evaluation in cognitive, affective and in psychomotor domain. The students will also be introduced to various instrument of measurement that has a link with physical and health education curriculum.

PQX7001 Statistik untuk Penyelidikan dalam Pendidikan (3 Jam Kredit)

PQX7001 Statistics for Research in Education (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini direkabentuk untuk membantu pelajar menggunakan statistik asas dalam penyelidikan pendidikan. Melalui tugas praktikal, pelajar akan mempelajari cara menggunakan prosedur statistik yang sesuai. Disamping itu, cara mengenalpasti masalah dalam analisis data seperti kes ekstrim (outlier), taburan tidak normal dan lain-lain juga akan dibincangkan. Data daripada penyelidikan pendidikan akan digunakan untuk menunjukkan bagaimana teknik statistik diaplikasi, ditafsir dan dilaporkan menurut format APA. Isi kandungan kursus ini termasuk organisasi data, perwakilan secara grafik, ukuran kecenderungan memusat, ukuran kebolehubahan, skala pengukuran, taburan normal, konsep pengujian hipotesis, perbandingan perbezaan antara dua min (sample besar dan kecil), perbandingan perbezaan antara dua varians, jadual kontingensi, pengujian khi kuasa dua, ujian korelasi Pearson, persampelan rawak yang ringkas dan ANOVA satu hala. Secara umum kursus ini merangkumi teknik prosedur deskriptif dan inferensi penting yang digunakan dalam penyelidikan pendidikan. Indeks saiz kesan dan cara meningkatkan kuasa sesuatu prosedur statistik juga akan dibincangkan.

The course is designed to assist students in applying basic statistics for research in education. Through practical assignments, students not only learn how to apply the statistical techniques. In addition, the methods in identifying in the problems in data analysis such as extreme values (outliers), non-normal distribution will be discussed. Data from educational research journals are used to illustrate how the statistical techniques are applied, described and reported using the APA format. The contents cover the organisation of data, graphical representation of data, measurements of variables, central tendency and variability; measurement scales; normal distribution; concept of hypothesis testing, comparison of means (small and large samples), comparison of variances, contingency tables, Chi Square test, Pearson correlation, random sample and one-way ANOVA. In general the course covers the most important descriptive and inferential statistical techniques used in educational research. Effect size indices and statistical power will be discussed.

PQB7005 Pengurusan Sumber Manusia dalam Pendidikan (3 Jam Kredit)
PQB7005 Human Resource Management in Education (3 Credit Hours)

Sinopsis/Synopsis

Di antara pendidik-pendidik profesional yang berkhidmat dalam perkhidmatan pendidikan, peranan pengurus sumber manusia adalah unik. Gerakerja sekolah, berbeza dengan pengurusan perniagaan kerana ia berasaskan sumber manusia – dilengkapkan terutamanya daripada manusia. Oleh yang demikian, pengurusan sumber manusia merupakan pusat kepada proses pengurusan sekolah awam, universiti dan lain-lain agensi pendidikan. Fokus kursus ini adalah memeriksa strategi jangka panjang di dalam pengurusan sumber manusia untuk membantu menarik, mengekal dan membina individu-individu di dalam sistem persekolahan, universiti dan juga lain-lain agensi pendidikan untuk mencapai matlamat keseluruhan organisasi-organisasi tersebut. Ini disempurnakan melalui sumber manusia/ fungsi individu di dalam meramal keperluan tenaga kerja, latihan, pemilihan, induksi, penilaian, pembangunan, ganjaran, kawalan, perundingan dan maklumat.

Among professional educators engaged in the delivery of educational services, the role of the human resource administrator is unique. The work of schools, in contrast to many enterprises is labor intensive – accomplished primarily by people. As a consequence, the administration of human resources is at the heart of the process of managing public schools, universities, and other educational agencies. The focus of this course is an examination of the long-range strategy of human resource management which seeks to help school systems, universities, and other educational agencies attract, retain and develop the kinds of personnel needed to achieve the overall goals of such organizations. This is accomplished through the human resource/personnel functions of forecasting manpower needs, recruitment, selection, induction, appraisal, development, compensation, security, negotiations and information.

Sinopsis/Synopsis

Kursus ini bertujuan untuk memperkenalkan dan membimbing pelajar untuk memahami secara mendalam tentang isu-isu pendidikan di peringkat global dan lokal berkaitan amalan-amalan profesional dalam satu daripada aspek pengurusan pendidikan. Pelajar dikehendaki untuk mensintesis dan menganalisis isu-isu yang dikenalpasti berdasarkan model-model dan teori-teori yang relevan terhadap skop kajian. Untuk membuatnya, pelajar perlu meneliti secara mendalam sebanyak mungkin literatur akademik daripada jurnal-jurnal terkemuka di peringkat global dan lokal dan daripada dapatan-dapatan tesis ijazah kedoktoran dari institusi pengajian tinggi di peringkat global dan lokal tentang satu topik/skop kajian yang perlu dipilih oleh seseorang pelajar. Dalam fasa kedua kursus, pelajar dikehendaki untuk mereka bentuk metodologi kajian dan seterusnya mengendalikan proses pemerhatian untuk memungut data dalam sebuah institusi pilihan mereka dengan memberi fokus kepada amalan-amalan profesional di dalam satu jenis isu berkaitan dengan pengurusan pendidikan. Berdasarkan format dan prosedur tugas pemerhatian, pelajar perlu menulis satu laporan dapatan kajian pemerhatian dan membuat pembentangan dapatan mereka bagi memenuhi keperluan penilaian kursus.

The course aims to introduce and guide students in understanding in details the educational issues at the global and local settings regarding professional practices in one of the aspects of educational planning and administration. Students are required to synthesise and analyse the identified issues based on relevant models and theories on the scope of the study. To do this, they have to review thoroughly academic literatures as many as possible from prominent journals all over the world and research findings from doctoral thesis at the global and local higher education institutions on one topic/scope of a study to be chosen by every individual student. In the second phase of the course, students are required to design the methodology of the study and eventually conduct the observation process of data gathering in one educational institution of their choice focussing on professional practices in one of the types of issues pertaining to educational planning and administration. Based on the existing specified format and procedures of the observation assignment, students are required to write a report of the observation study and do their final presentation of their findings to fulfil the course assessment requirement.

Determination of the research area must be carried out before the candidate begins his/her research.

4. Pembentangan Seminar 1 dan Seminar 2

Proposal Defence and Cadidature Defence Presentation

Membentangkan cadangan penyelidikan dalam Proposal Defence;

Present your research proposal at Proposal Defence;

Membentangkan kemajuan penyelidikan dalam Candidature Defence;

Present your research progress at Candidature Defence;

5. Penyerahan / Submission

- (1) Tajuk disertasi hendaklah dikemukakan kepada Fakulti untuk kelulusan semasa calon memberi notis untuk penyerahan disertasinya.

The dissertation title must be submitted to the Faculty for approval when the candidate gives notice for the submission of his/her dissertation

- (2) Calon hendaklah menyerahkan disertasi untuk peperiksaan dalam tempoh pencalonannya. Tempoh yang diambil untuk pemeriksaan disertasi dan apa-apa tempoh pembetulan atau kajian lanjut yang diperlukan oleh Jawatankuasa Pemeriksa tidak dianggap sebagai sebahagian daripada tempoh maksimum pencalonan calon.

The candidate shall submit his/her dissertation for examination within the candidacy period. The time taken for the examination of dissertation and any period of correction or further review required by the Examination Committee is not considered as part of the maximum candidature period.

SINOPSIS KURSUS / COURSE SYNOPSIS

POF7001 Kaedah Penyelidikan Kuantitatif dalam Perancangan dan Pentadbiran Pendidikan (3 Jam Kredit)

POF7001 Quantitative Research Method in Educational Planning and Administration (3 Credit hours).

Sinopsis/Synopsis

Kursus ini direka bentuk untuk mambantu pelajar-pelajar dalam mengaplikasi analisis statistik untuk penyelidikan di dalam pengurusan dan perancangan pendidikan. Melalui tugas-tugas secara praktikal, pelajar-pelajar bukan sahaja mempelajari bagaimana untuk mengaplikasi teknik-teknik statistik, tetapi juga belajar bagaimana untuk membuat persediaan dan menapis data, dan bagaimana untuk mengatasi masalah-masalah biasa seperti kehilangan nilai data, ketidaknormalan dan lain-lain lagi. Selain itu, pelajar-pelajar akan mempelajari bagaimana untuk menyediakan dan mereka bentuk laporan berdasarkan teknik-teknik penulisan akademik. Artikel-artikel daripada jurnal-jurnal penyelidikan pendidikan akan digunakan untuk diilustrasikan bagaimana teknik-teknik statistik diaplikasikan dan dihuraikan di dalam literatur saintifik, dan bagaimana dapatan-datapan penyelidikan dilaporkan dan diinterpretasikan. Kandungan kursus akan merangkumi aspek penyusunan data, pengukuran variabel-variabel, varians pertengahan, skala-skala pengurusan, taburan normal; konsep ujian hipotesis, perbandingan min (sampel kecil dan besar), perbandingan pembezaan, jadual-jadual kontingensi, ujian Chi Square, korelasi Pearson Moment, sampel rawak, ANOVA satu hala, regresi berganda dan MANOVA. Secara amnya, kursus meliputi semua teknik statistik deskriptif dan inferensi yang akan digunakan di dalam kaedah penyelidikan. Indeks kesan saiz dan kuasa statistik akan dibincangkan untuk kesemua teknik statistik yang dinyatakan.

The course is designed to assist students in applying statistical analysis for research in educational management & planning. Through practical assignments, students not only learn how to apply the statistical techniques, but also how to prepare and screen data, and how to handle commonly encountered problems such as missing values, outliers, non-normality etc. Moreover, students will learn how to prepare and design the report based on academic writing techniques. Research Articles from educational research journals are used to illustrate how the statistical techniques are applied and described in the scientific literature, and how the results can be reported and interpreted. The contents cover the organisation of data, measurements of variables, central tendency and variability; measurement scales; normal distribution; concept of hypothesis testing, comparison of means (small and large samples), comparison of variances, contingency tables, Chi Square test, Pearson Moment correlation, random sample, one-way ANOVA, multiple regression and MANOVA. In general the course covers the most important descriptive and inferential statistical techniques used in educational research. Effect size indices and statistical power will be discussed for all mentioned statistical techniques.

POF7002 Disertasi (35 Jam Kredit)
POF7002 Dissertation (35 Credit hours).

Sinopsis/Synopsis

Kursus ini memerlukan pelajar meformulasikan masalah kajian dan kerangka konseptual / teori yang berkaitan dalam mana-mana bidang relevan untuk program yang didaftar dan menjalankan kajian secara koheren. Pelajar akan menjalankan ulasan literature dan mengaplikasikan kaedah sesuai untuk kutipan data dan analisis. Pelajar akan di selia oleh seorang penyelia sepanjang proses ini. Satu disertasi akan di serahkan untuk penilaian.dibincangkan secara kritikal oleh para pelajar.

This course requires the student to formulate a research problem and the related conceptual / theoretical frameworks in any relevant field for the programme registered for and carry out the research coherently. Students would conduct a comprehensive review of the relevant literature, and use appropriate methods of data collection and analysis. Students would be supervised by a lecturer throughout the process. A dissertation will be submitted for examination.

POF7003 Kaedah Penyelidikan Kualitatif dalam Perancangan dan Pentadbiran Pendidikan (3 Jam Kredit)
POF7003 Qualitative Research Method in Educational Planning and Administration (3 Credit hours).

Sinopsis/Synopsis

Kursus ini memperkenalkan kepada pelajar kepada ciri-ciri dan prinsip-prinsip kaedah-kaedah penyelidikan kualitatif di dalam pengurusan dan perancangan pendidikan. Ia mengkaji secara mendalam isu-isu yang berkait rapat dengan pelbagai perbezaan dalam kaedah-kaedah penyelidikan kualitatif seperti kajian kes, etnografi, fenomenologi dan lain-lain berdasarkan asas-asas falsafah, kerangka konseptual/teoretikal dan pemungutan data. Fokus spesifik akan diberikan kepada melatih para pelajar dalam penggubalan soalan, strategi pemilihan persampelan, penentuan teknik-teknik pemungutan data seperti temu bual, membuat pemerhatian, dan analisis dokumen, dan lain-lain lagi. Pelajar-pelajar akan didedahkan kepada isu-isu yang berhubungkait dengan metodologi penyelidikan kualitatif seperti isu-isu etika, kesahan dan kebolehpercayaan. Persembahan ala sarjana dan teknik-teknik penulisan akademik untuk usulan penyelidikan kualitatif akan diteliti.

This course introduces students to the characteristics and principles of qualitative research methods in educational management & planning . It examines in depth issues relating to differences between various the qualitative research methods such as case study, ethnography, phenomenology etc. in terms of philosophical foundations, theoretical/ conceptual framework and data collection. Specific focus will be given on the training students in question development, selection of sampling strategy, determination of data collection techniques such as interviewing, making observation, and document analysis, etc. Students will also be exposed to issues related to qualitative research methodology such as ethical issues, validity and reliability. PQB7005 Pengurusan Sumber Manusia dalam Pendidikan (3 Jam Kredit)
PQB7005 Human Resource Management in Education (3 Credit Hours)

Sinopsis/Synopsis

Di antara pendidik-pendidik profesional yang berkhidmat dalam perkhidmatan pendidikan, peranan pengurus sumber manusia adalah unik. Gerakerja sekolah, berbeza dengan pengurusan perniagaan kerana ia berasaskan sumber manusia – dilengkapkan terutamanya daripada manusia. Oleh yang demikian, pengurusan sumber manusia merupakan pusat kepada proses pengurusan sekolah awam, universiti dan lain-lain agensi pendidikan. Fokus kursus ini adalah memeriksa strategi jangka panjang di dalam pengurusan sumber manusia untuk membantu menarik, mengekal dan membina individu-individu di dalam sistem persekolahan, universiti dan juga lain-lain agensi pendidikan untuk mencapai matlamat keseluruhan organisasi-organisasi tersebut. Ini disempurnakan melalui sumber manusia/ fungsi individu di dalam meramal keperluan tenaga kerja, latihan, pemilihan, induksi, penilaian, pembangunan, ganjaran, kawalan, perundingan dan maklumat.

Among professional educators engaged in the delivery of educational services, the role of the human resource administrator is unique. The work of schools, in contrast to many enterprises is labor intensive – accomplished primarily by people. As a consequence, the administration of human resources is at the heart of the process of managing public schools, universities, and other educational agencies. The focus of this course is an examination of the long-range strategy of human resource management which seeks to help school systems, universities, and other educational agencies attract, retain and develop the kinds of personnel needed to achieve the overall goals of such organizations. This is accomplished through the human resource/personnel functions of forecasting manpower needs, recruitment, selection, induction, appraisal, development, compensation, security, negotiations and information.

Program Sarjana Pendidikan (Pendidikan Awal Kanak-Kanak) bertujuan untuk melahirkan ahli profesional dalam bidang pendidikan awal kanak-kanak yang mempunyai pengetahuan dan kemahiran mendidik, mengasuh, membangunkan kurikulum, menilai proses pengajaran dan pembelajaran di bilik darjah, mengurus dan mentadbir program yang berkaitan dan pendidikan awal kanak-kanak, mengenalpasti pedagogi, pendekatan proses pengajaran dan pembelajaran, sumber dan inovasi untuk mempertingkatkan pembelajaran dalam pelbagai konteks pendidikan awal kanak-kanak..

Programme Aim

The Master of Education (Early Childhood Education) programme aims to produce professionals in the field of early childhood education who are equipped with sound knowledge and instructional skills, able to care for young children, develop curriculum, evaluate teaching and learning process in the classrooms, manage and administer programmes related to early childhood education, able to identify pedagogy, teaching and learning approaches, resources and innovation in enhancing learning in various context of early childhood education.

5. **Hasil Pembelajaran Program** **Programme Learning Outcomes**

Di akhir program, pelajar dapat;
At the end of the programme, student will be able to:

Domain MQF	Hasil Pembelajaran / Learning Outcomes
PO1	Menguasai teori dan pedagogi yang sesuai dalam perkembangan dan pendidikan awal kanak-kanak <i>Master relevant theories and pedagogies pertaining to the field of early childhood education</i>
PO2	Mengaplikasikan teori ke praktis sebenar di bilik darjah untuk mempertingkatkan pembelajaran dan prestasi kanak-kanak <i>Integrate knowledge in the field of early childhood education through practical skills such as teaching, assessment and research</i>
PO3	Menunjukkan minat dan keperihatinan terhadap perkembangan kanak-kanak dan dunia pendidikan awal kanak-kanak <i>Display interest and awareness on child development and the field of early childhood education</i>
PO4	Berpegang kepada standard etika dalam pendidikan dan amalan paling berkesan dalam bidang pendidikan awal kanak-kanak <i>Practise ethical values, awareness and best practices in the field of early childhood education</i>
PO5	Berkomunikasi dengan berkesan dan dapat bekerjasama dalam komuniti pendidikan awal kanak-kanak dalam kepimpinan yang sesuai dan mengikut kehendak semasa <i>Apply communication, leadership, and team work skills with various parties in running activities in early childhood education</i>
PO6	Menganalisis secara kritis penyelidikan, aliran dan isu berkaitan dengan bidang pendidikan awal kanak-kanak <i>Analyse issues pertaining to early childhood education critically and solve them with scientific skills</i>
PO7	Melibatkan diri dalam pembelajaran sepanjang hayat dan mengurus maklumat yang berkaitan dengan pendidikan awal kanak-kanak <i>Practice information management and lifelong learning skills related to early childhood education</i>

6. **Struktur Program**

Struktur Program Sarjana Pendidikan (Pendidikan Awal Kanak-Kanak) berasaskan pendekatan bersifat kontemporari untuk melahirkan graduan dalam pendidikan awal kanak-kanak yang cemerlang. Kandungan kurikulum direkabentuk berdasarkan perkembangan ilmu pendidikan daripada perspektif perkhidmatan dan pengajaran yang sejajar dengan Falsafah Pendidikan

Kebangsaan, Wawasan Negara, Pelan Transformasi Negara serta Pelan Pembangunan Pendidikan Malaysia (Pendidikan Tinggi).

Program ini merangkumi Empat Puluh Dua (42) jam kredit yang merangkumi Sembilan (9) jam kredit bagi kursus teras, Sembilan (9) jam kredit bagi kursus elektif dan Dua Puluh Empat (24) jam kredit bagi disertasi yang melibatkan aktiviti kuliah, tugasan, pembentangan, kerja projek, perbincangan bersemuka dan forum dalam talian, dan pembelajaran teradun (blended learning).

Programme Structure

The Master of Education (Early Childhood Education) programme structure is based on a contemporary approach to producing outstanding graduates in early childhood education. The curriculum content is designed based on the development of education from the perspective of services and teaching in line with the National Philosophy of Education, National Vision, National Transformation Plan and Malaysian Education Development Plan (Higher Education).

The programme comprises Forty Two (42) credit hours that includes Nine (9) credit hours for the Programme Core Courses, Nine (9) credit hours for Specialized Elective Courses and Twenty Four (24) credit hours for dissertation involving lectures, assignments, discussions, presentations, research, visits and technology-based approaches.

SINOPSIS KURSUS / COURSE SYNOPSIS

POX7001 Kaedah Penyelidikan dalam Pendidikan (3 Jam Kredit)

POX7001 Research Methods in Education (3 Credit Hours)

Sinopsis/Synopsis

Pelajar diberi pendedahan tentang proses menjalankan penyelidikan dalam pendidikan. Antara aspek yang akan dibincang adalah (1) konsep asas dalam penyelidikan; (2) memilih permasalahan kajian yang hendak dikaji dan kenapa mengkajinya; (3) membentuk soalan kajian yang relevan; (4) mengulas secara kritikal kajian yang lalu, membanding teori yang bersabit dan membentuk hipotesis; (5) menganalisis beberapa kaedah mengumpul data dan memilih kaedah yang sesuai; (6) menganalisis data dan menginterpretasi dapatan; (7) menyimpulkan dapatan; dan (8) mengkaji gaya penulisan beberapa laporan penyelidikan; dan (9) berupaya memberi justifikasi bagi setiap tindakan di atas.

Students will be introduced to the entire process of conducting research in education. Among the topics to be discussed include: (1) basic concepts in research; (2) selection of a topic or problem to carry out research; (3) to design relevant research questions; (4) critically review relevant past studies to discern relevant theories to help answer the research questions; (5) to state the research hypothesis; (6) to select appropriate method or methods of gathering data; (7) use of appropriate method of analyzing the data and drawing meaningful interpretation and conclusion; (8) analyze the major components of a research report or dissertation (9) be able to provide justification for each of the above steps taken.

POB7006 Intervensi awal kanak-kanak (3 Jam Kredit)

POB7006 Early Childhood Intervention (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini melibatkan pengenalan awal, perkhidmatan, sokongan dan intervensi untuk kanak-kanak, dari lahir sehingga 4 tahun, yang menunjukkan kelewatan dalam perkembangan yang menimbulkan risiko masalah pembelajaran (LD). Perkembangan mungkin dikaitkan dengan variasi individu dalam kadar dan corak kematangan, faktor persekitaran seperti pendedahan kepada bahasa, dan kualiti peluang pembelajaran. Indikasi awal yang kanak-kanak mungkin mengalami masalah pembelajaran termasuk masalah perkembangan pertuturan dan bahasa, koordinasi motor, persepsi, pentaaklukan, interaksi sosial, prasyarat pencapaian akademik dan bidang lain yang relevan kepada pencapaian objektif pembelajaran. Indikator ini boleh kelihatan seiringan dengan masalah regulasi sendiri, penumpuan, atau interaksi sosial. Kursus ini juga mengambil kira wacana masa kini dalam pendidikan awal kanak-kanak yang berfokus kepada perbezaan dalam falsafah dan imej ketidakupayaan dan perkaitan variasi tersebut dengan konsep penilaian bermakna, hak keluarga dan kanak-kanak, terangkuman (inclusion), gabungjalinan dengan ibu bapa dan ahli profesion, pendekatan kepada kurikulum dan penggunaan alat teknologi dalam praktis.

This course addresses early identification, services, supports, and intervention for young children, birth through 4 years, who demonstrate delays in development that may place them at risk for later identification as having a learning disability (LD). Development may be related to individual variations in rates and patterns of maturation, environmental factors such as language exposure, and quality of learning opportunities. Early indicators that a child may have LD include delays in speech and language development, motor coordination, perception, reasoning, social interaction, prerequisites to academic achievement and other areas relevant to meeting educational goals. These indicators may occur concomitantly with problems in self-regulation, attention, or social interaction. This course will also consider current debates in early childhood special education focussed around divergence in philosophy and images of disability and the relationship of these variations to concepts of meaningful assessment, child and family rights, inclusion, partnerships with parents and professionals, approaches to curriculum and incorporation of technological tools into practice.

POD7006 Pengajaran Matematik Masa Awal Kanak-Kanak (3 Jam Kredit)***POD7006 Teaching of Mathematics in Early Childhood (3 Credit Hours)***

Sinopsis/Synopsis

Kursus ini bertujuan untuk membantu para pelajar memahami kaedah yang berkesan untuk mengajar matematik masa awal kanak-kanak. Antara topik yang dibincangkan termasuklah kandungan matematik dalam kurikulum prasekolah, asas psikologi bagi pengajaran matematik masa awal kanak-kanak, pengajaran untuk pemahaman dan pembinaan, model bersepadu bagi pengajaran matematik masa awal kanak-kanak, pengajaran nombor dan konsep pengangkaan, perkembangan pemikiran geometri dan pengajaran pengukuran dalam matematik prasekolah. Kursus ini juga akan membincangkan idea penyelidikan yang berkaitan dengan pengajaran matematik masa awal kanak-kanak.

The aim of this course is to assist students in understanding the suitable methods in teaching early mathematics to children. Topics of discussion include among others the mathematics content in the preschool curriculum, psychological basis in teaching early mathematics, teaching for understanding and construction of knowledge, an integrated model of teaching early mathematics, teaching of numbers and numerals, the development of geometrics thinking and measurement in early mathematics. This course will also discuss research ideas related to teaching or early mathematics for children.

POB7002 Disertasi (24 Jam Kredit)
POB7002 Dissertation (24 Credit Hours)

Sinopsis/Synopsis

Kursus ini memerlukan pelajar memformulasikan masalah kajian dan kerangka konseptual / teori yang berkaitan dalam mana-mana bidang relevan untuk program yang didaftarkan dan menjalankan kajian secara koheren. Pelajar akan menjalankan ulasan literatur dan mengaplikasikan kaedah sesuai untuk kutipan data dan analisis. Pelajar akan diselia oleh seorang penyelia sepanjang proses ini. Satu disertasi akan diserahkan untuk penilaian.

This course requires the student to formulate a research problem and the related conceptual / theoretical frameworks in any relevant field for the programme registered for and carry out the research coherently. Students would conduct a comprehensive review of the relevant literature, and use appropriate methods of data collection and analysis. Students would be supervised by a lecturer throughout the process. A dissertation will be submitted for examination.

3. Tempoh Pengajian

Tempoh Minimum : 3 Semester
Tempoh Maksimum : 8 Semester

Duration of Study

Minimum Duration : 3 Semesters
Maximum Duration : 8 Semesters

4. **Matlamat Program**

Program Sarjana Pendidikan (Pengukuran dan Penilaian) bertujuan untuk melahirkan ahli profesional dalam bidang pengukuran dan penilaian yang mempunyai pengetahuan dan kemahiran yang mencukupi. Selain itu, program ini dapat melahirkan individu yang menguasai teknik membina ujian, analisis psikometri ujian, penilaian program serta menganalisis hasil ujian untuk mempertingkatkan pembelajaran dalam pelbagai konteks pengukuran dan penilaian dalam pendidikan.

Programme Aim

The Master of Education (Measurement and Evaluation) programme aims to produce professionals in the field of measurement and evaluation with sufficient knowledge and skills. Additionally, the programme aims to produce individuals who master the techniques to develop tests, analysis of psychometric tests, programme evaluation and analysis of test results to improve teaching in various measurement and evaluation contexts in education.

5. **Hasil Pembelajaran Program**

Programme Learning Outcomes

Di akhir program, pelajar dapat;

At the end of the programme, student will be able to;

Domain MQF	Hasil Pembelajaran / Learning Outcomes
PO1	Menguasai pengetahuan dalam bidang pengukuran dan penilaian <i>Master the knowledge in measurement and evaluation</i>
PO2	Mempraktikkan bidang pengukuran dan penilaian melalui pengajaran, penilaian dan penyelidikan dengan menggunakan teknologi komunikasi dan maklumat <i>Apply measurement and evaluation through teaching, assessment and research by using information and communication technology</i>
PO3	Mempamerkan sikap keprihatinan terhadap isu semasa yang berkaitan dengan bidang pengukuran dan penilaian <i>Apply social skills and responsibilities on current issues related to the field of measurement and evaluation</i>
PO4	Mengaplikasikan etika dan amalan terbaik secara profesional dalam bidang pengukuran dan penilaian <i>Practise ethical values, awareness and professionalism in the field of measurement and evaluation</i>
PO5	Mempamerkan nilai kepimpinan dan kerjasama dengan pelbagai pihak bagi melaksanakan aktiviti dalam bidang pengukuran dan penilaian <i>Apply communication, leadership, and team work skills with various parties in running activities in measurement and evaluation</i>
PO6	Menganalisis secara kritis, teori, polisi dan aliran kontemporari berkaitan bidang pengukuran dan penilaian <i>Analyse issues pertaining to measurement and evaluation critically and solve them with scientific skills</i>
PO7	Melibatkan diri dalam pembelajaran sepanjang hayat dan mengurus maklumat yang berkaitan dengan pengukuran dan penilaian <i>Practise information management and lifelong learning skills related to measurement and evaluation</i>

6. **Struktur Program**

Struktur Program Sarjana Pendidikan (Pengukuran dan Penilaian) berasaskan pendekatan bersifat kontemporari untuk melahirkan graduan dalam pengukuran dan penilaian yang cemerlang. Kandungan kurikulum direkabentuk berdasarkan perkembangan ilmu pendidikan daripada perspektif perkhidmatan dan pengajaran yang sejajar dengan Falsafah Pendidikan Kebangsaan, Wawasan Negara, Pelan Transformasi Negara serta Pelan Pembangunan Pendidikan Malaysia (Pendidikan Tinggi).

Program ini merangkumi Empat Puluh Lima (45) jam kredit yang merangkumi Dua Belas (12) jam kredit bagi kursus teras, Tiga (3) jam kredit bagi kursus elektif dan Tiga Puluh (30) jam kredit bagi disertasi yang melibatkan aktiviti kuliah, tugas, perbincangan, pembentangan, penyelidikan, lawatan dan pendekatan yang berasaskan teknologi.

Programme Structure

Master of Education (Measurement and Evaluation) Programme structure is based on a contemporary approach to producing outstanding graduates in measurement and evaluation. The curriculum content is designed based on the development of education from the perspective of services and teaching in line with the National Philosophy of Education, National Vision, National Transformation Plan and Malaysian Education Development Plan (Higher Education).

The programme comprises Fourty Five (45) credit hours that includes Twelve (12) credit hours for the Program Core Courses, Three (3) credit hours for Specialized Elective Courses and Thirty (30) credit hours for dissertation involving lectures, assignments, discussions, presentations, research, visits and technology-based approaches.

1. Pendaftaran Kursus / Course Registration

- (1) Pendaftaran kursus dilakukan dalam tempoh selama dua (2) minggu dari tarikh permulaan semester.

Course registration must be completed within two (2) weeks from the date the semester begins

- (2) Seseorang calon hendaklah mendaftar sekurang-kurangnya tiga (3) kredit kursus termasuk kredit yang diperuntukan bagi penyelidikan pada mana-mana semester melainkan ia diluluskan penarikan diri daripada semester berkenaan

The candidate must register for at least three (3) credits hours including credit allocated for research in any given semester unless withdrawal from that semester has been approved.

2. Penyeliaan / Supervision

Pelantikan penyelia dilakukan tidak lewat daripada semester pertama pengajian.

Appointment of supervisor must be done not later than the first semester of study.

3. Ketetapan Bidang Penyelidikan / Determination of Research Area

Ketetapan bidang bagi disertasi hendaklah dilakukan sebelum calon memulakan penyelidikannya.

Determination of the research area must be carried out before the candidate begins his/her research.

4. Pembentangan Seminar 1 dan Seminar 2

Proposal Defence and Cadidature Defence Presentation

Membentangkan cadangan penyelidikan dalam Proposal Defence;

Present your research proposal at Proposal Defence;

Membentangkan kemajuan penyelidikan dalam Candidature Defence;

Present your research progress at Candidature Defence;

5. Penyerahan / Submission

- (1) Tajuk disertasi hendaklah dikemukakan kepada Fakulti untuk kelulusan semasa calon memberi notis untuk penyerahan disertasinya.

The dissertation title must be submitted to the Faculty for approval when the candidate gives notice for the submission of his/her dissertation

- (2) Calon hendaklah menyerahkan disertasi untuk peperiksaan dalam tempoh pencalonannya. Tempoh yang diambil untuk pemeriksaan disertasi dan apa-apa tempoh pembetulan atau kajian lanjut yang diperlukan oleh Jawatankuasa Pemeriksa tidak dianggap sebagai sebahagian daripada tempoh maksimum pencalonan calon.

The candidate shall submit his/her dissertation for examination within the candidacy period. The time taken for the examination of dissertation and any period of correction or further review required by the Examination Committee is not considered as part of the maximum candidature period.

SINOPSIS KURSUS / COURSE SYNOPSIS

POX7001 Kaedah Penyelidikan dalam Pendidikan (3 Jam Kredit)

POX7001 Research Methods in Education (3 Credit Hours)

Sinopsis/Synopsis

Pelajar diberi pendedahan tentang proses menjalankan penyelidikan dalam pendidikan. Antara aspek yang akan dibincang adalah (1) konsep asas dalam penyelidikan; (2) memilih permasalahan kajian yang hendak dikaji dan kenapa mengkajinya; (3) membentuk soalan kajian yang relevan; (4) mengulas secara kritikal kajian yang lalu, membanding teori yang bersabit dan membentuk hipotesis; (5) menganalisis beberapa kaedah mengumpul data dan memilih kaedah yang sesuai; (6) menganalisis data dan menginterpretasi dapatan; (7) menyimpulkan dapatan; dan (8) mengkaji gaya penulisan beberapa laporan penyelidikan; dan (9) berupaya memberi justifikasi bagi setiap tindakan di atas.

Students will be introduced to the entire process of conducting research in education. Among the topics to be discussed include: (1) basic concepts in research; (2) selection of a topic or problem to carry out research; (3) to design relevant research questions; (4) critically review relevant past studies to discern relevant theories to help answer the research questions; (5) to state the research hypothesis; (6) to select appropriate method or methods of gathering data; (7) use of appropriate method of analyzing the data and drawing meaningful interpretation and conclusion; (8) analyze the major components of a research report or dissertation (9) be able to provide justification for each of the above steps taken.

PQX7001 Statistik untuk Penyelidikan dalam Pendidikan (3 Jam Kredit)

PQX7001 Statistics for Research in Education (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini direkabentuk untuk membantu pelajar menggunakan statistik asas dalam penyelidikan pendidikan. Melalui tugas praktikal, pelajar akan mempelajari cara menggunakan prosedur statistik yang sesuai. Disamping itu, cara mengenalpasti masalah dalam analisis data seperti kes ekstrim (outlier), taburan tidak normal dan lain-lain juga akan dibincangkan. Data daripada penyelidikan pendidikan akan digunakan untuk menunjukkan bagaimana teknik statistik diaplikasi, ditafsir dan dilaporkan menurut format APA. Isi kandungan kursus ini termasuk organisasi data, perwakilan secara grafik, ukuran kecenderungan memusat, ukuran kebolehubahan, skala pengukuran, taburan normal, konsep pengujian hipotesis, perbandingan perbezaan antara dua min (sampel besar dan kecil), perbandingan perbezaan antara dua varians, jadual kontingensi, pengujian khi kuasa dua, ujian korelasi Pearson, persampelan rawak yang ringkas dan ANOVA satu hala. Secara umum kursus ini merangkumi teknik prosedur deskriptif dan inferensi penting yang digunakan dalam penyelidikan pendidikan. Indeks saiz kesan dan cara meningkatkan kuasa sesuatu prosedur statistik juga akan dibincangkan.

The course is designed to assist students in applying basic statistics for research in education. Through practical assignments, students not only learn how to apply the statistical techniques. In addition, the methods in identifying in the problems in data analysis such as extreme values (outliers), non-normal distribution will be discussed. Data from educational research journals are used to illustrate how the statistical techniques are applied, described and reported using the APA format. The contents cover the organisation of data, graphical representation of data, measurements of variables, central tendency and variability; measurement scales; normal distribution; concept of hypothesis testing, comparison of means (small and large samples), comparison of variances, contingency tables, Chi Square test, Pearson correlation, random sample and one-way ANOVA. In general the course covers the most important descriptive and inferential statistical techniques used in educational research. Effect size indices and statistical power will be discussed.

POM7001 Teori Pengukuran (3 Jam Kredit)

POM7001 Measurement Theory (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini bertujuan untuk memperkenalkan pelajar unsur-unsur teori ujian klasik dan konsep asas pengukuran pendidikan. Topik turut membincangkan termasuk menerangkan pengukuran dalam pendidikan, skala pengukuran, teori ujian, konsep statistik dan asas untuk teori ujian, pengenalan kepada skala, skor ujian sebagai komposit kebolehpercayaan dan model klasik skor sebenar. Prosedur untuk menganggar kebolehpercayaan, kesahan, klasifikasi dan penentuan standard (piawaian).

The purpose of this course is to introduce students to the elements of classical test theory and the basic concepts of educational measurement. The topics for discussion include: measurement science, measurement scales, test theory, concepts and foundation for test theory, introduction to scaling, test scores as composites, reliability and the classical true scores models, procedures for estimating reliability, reliability coefficients for criterion-referenced tests, introduction to validity, statistical procedures for prediction and classification, test scoring and interpretation, setting standards and introduction to modern test theory.

POM7002 Pengukuran dan Penilaian dalam Pendidikan (3 Jam Kredit)
POM7002 Measurement and Evaluation in Education (3 Credit Hours)

Sinopsis/Synopsis

Objektif kursus ini adalah memperkenalkan kepada pelajar isu asas dalam pengukuran pendidikan dan penggunaan instrumen pengukuran dalam pendidikan. Topik-topik termasuk : Sifat pengukuran dan fungsi, penyampaian maklumat dan interpretasi data kuantitatif, makna dan penggunaan norma, kesahan dan kebolehpercayaan ujian, faktor-faktor luaran yang mempengaruhi prestasi ujian kognitif, prinsip umum pembinaan ujian, penggubalan dan penggunaan ujian esei, pembinaan ujian objektif, analisis item untuk ujian di bilik darjah, pentaksiran variabel efektif, penggredan dan pelaporan, pengukuran “*scholastic attitude*” ujian pencapaian piawai dan ukuran piawai tentang minat, personaliti dan ukuran tingkahlaku sosial.

The objective of this course is to introduce to students the fundamental issues in educational measurement and use of measurement instruments in educational setting. The topics will include: the nature of measurement and its functions, delivery of information and interpretation of quantitative data, the meaning and application of norms, test validity and reliability, the external factors affecting the performance of cognitive tests, the general principles of test construction, formulation and use of essay tests, test construction objectives, analysis of test items for the classroom, the assessment of the effective variable, grading and reporting, measuring scholastic attitude, standardized achievement tests and standard interest, personality and social behavior measures.

POM7003 Asas Analisis Faktor (3 Jam Kredit)
POM7003 Fundamentals of Factor Analysis (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini membentangkan asas analisis faktor. Teori dan kegunaan faktor analisis dalam penyelidikan pendidikan akan dihuraikan. Kursus ini juga menerapkan pemahaman terhadap lojik, pendekatan-pendekatan dan teknik-teknik analisis faktor 'exploratory' dan analisis faktor 'confirmatory' dalam penyelidikan pendidikan. Pelajar akan mendalami dan memahami kemahiran dan pengetahuan yang berkaitan untuk menganalisis data kuantitatif menggunakan perisian-perisian khusus (SPSS & AMOS).

This course will present the fundamentals of factor analysis. The theory and application of factor analysis in educational research is explored. Topics include: matrix algebra operations, the theory of common factor model and its difference from principal components analysis and the implication of employing each type of model in data analysis, types of factor extraction, principles of factor extraction, class of rotations for interpretation, the history and development of factor analysis, its use and abuse in the literature and recent developments in the field. Besides exploratory factor analysis, confirmatory factor analysis using appropriate software will also be addressed. Basic skills in the use of a statistical software package (LISREL) that is necessary for this course will be presented.

POM7004 Rekabentuk Instrumen dan Pembinaan Item (3 Jam Kredit)
POM7004 Instrument Design and Item Development (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini akan membincangkan asas rekabentuk dan penggubalan instrumen untuk penyelidikan pendidikan. Topik-topik termasuk: konsep asas dan isu dalam pembentukan instrumen, rekabentuk instrumen, aras pengukuran, dan kegunaan statistik yang sesuai, penjelasan pernyataan objektif pembinaan instrumen, penelitian pendekatan yang hendak digunakan, pembuatan keputusan tentang dimensi yang hendak dikaji, format yang hendak digunakan, pembangunan himpunan item, proses Q-sort item, pembentukan skala, kekuatan dan kelemahan skala Likert, Semantic Differential, Guttman, Thurstone, pemurnian item, penataan dan rekabentuk instrumen, panduan pentadbiran dan penskoran. Ciri-ciri psikometrik instrumen berdasarkan manual standard APA akan dibincang.

This course will present the fundamentals of instrument design and development for educational research. Topics include basic concepts and issues in instrument development, instrument design, levels of measurement and the appropriate statistics to be used, clarification of the objectives of the instrument development, examination of the approaches to be adopted, decision on the dimensions of interest, format to be used, development of a pool of items, Q-sorting of items, scale development, the strengths and weaknesses of Likert, and Semantic differential, Guttman, Thurstone scales, item refinement, design layout, administration and scoring guide. The psychometric properties of the instrument based on the APA and Standards will also be addressed.

POM7005 Model-model Penilaian (3 Jam Kredit) **POM7005 Evaluation Models (3 Credit Hours)**

Sinopsis/Synopsis

Kursus ini akan mempersembahkan pelbagai model penilaian tradisional dan kontemporari yang digunakan dalam penyelidikan penilaian. Topik perbincangan termasuklah: Penyelidikan penilaian dan profesion itu, model-model utama penilaian, seperti Tylerian, CIPP, Countertrance, Suchman, penilaian Goal free dan lain-lain model. Laporan penerbitan dalam penyelidikan penilaian akan dibentang untuk dikritik oleh ahli kelas.

This course will present the array of traditional and contemporary evaluation models used in evaluation research. The topics for discussion include: Evaluation research as a discipline, its major differences from traditional educational research, the history and development of the evaluation research movement, major models of evaluation such as the Tylerian, Context Input, Process Product (CIPP), Countertance, Suchman, Goal Free evaluation and other models. Published work in evaluation research will be presented for class critique.

PON7006 Pengujian Psikologi (3 Jam Kredit)
PON7006 Psychological Testing (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini bertujuan mendedahkan pelajar kepada pelbagai ujian psikologi yang digunakan dalam perkhidmatan psikologi dan kaunseling. Melalui kursus ini, pelajar diharap akan dapat membina kemahiran menilai, mentadbir memarkat, mengintepretasi dan menganalisa ujian psikologi dengan baik. Pelajar akan didedahkan kepada beberapa instrumen psikologi bagi mengukur aptitude, pencapaian, kecerdasan, personaliti, dan minat kerjaya klien. Pelajar juga akan didedahkan kepada beberapa elemen penting dalam ujian psikologi seperti fungsi ujian, isu perundangan, kesahan, kebolehpercayaan, etika dan penggunaan ujian untuk individu mengikut pelbagai latar belakang sosial, ekonomi, kebudayaan, dan etnik.

The course objective is to expose students to various tests used in psychology and counselling services. Through this course, it is hoped that the student is able to acquire skills in analysing, administering, scoring, and interpreting psychology tests. Students will develop skills on selected tests such as aptitude, achievement, personality, intelligence, and interest in career. Other issues that are related to the tests such as the functions of the tests, legal issues, validity and reliability, ethics and the use of testing for individuals from different socioeconomic, cultural and ethnic backgrounds will also be discussed.

POX7002 Disertasi (30 Jam Kredit)**POX7002 Dissertation (30 Credit Hours)**

Sinopsis/Synopsis

Kursus ini memerlukan pelajar meformulasikan masalah kajian dan kerangka konseptual / teori yang berkaitan dalam mana-mana bidang relevan untuk program yang didaftar dan menjalankan kajian secara koheren. Pelajar akan menjalankan ulasan literatur dan mengaplikasikan kaedah sesuai untuk kutipan data dan analisis. Pelajar akan di selia oleh seorang penyelia sepanjang proses ini. Satu disertasi akan di serahkan untuk penilaian.

This course requires the student to formulate a research problem and the related conceptual / theoretical frameworks in any relevant field for the programme registered for and carry out the research coherently. Students would conduct a comprehensive review of the relevant literature, and use appropriate methods of data collection and analysis. Students would be supervised by a lecturer throughout the process. A dissertation will be submitted for examination.

PQA7009 Kaunseling Kelompok (3 Jam Kredit)
PQA7009 Group Counselling (3 Credit Hours)

Sinopsis/Synopsis

Kursus ini bertujuan untuk melatih pelajar merancang dan menguruskan sesi kaunseling kelompok secara professional dan berkesan. Kursus ini akan memberi fokus kepada mengembangkan kemahiran komunikasi dan kepimpinan dalam kalangan pelajar melalui sesi amali kaunseling kelompok. Melalui kombinasi pembelajaran teoritikal dan pembelajaran berasaskan pengalaman dalam sesi kaunseling kelompok sebenar, pelajar akan mampu menentukan strategi dan teori yang bersesuaian untuk menguruskan isu-isu berbangkit semasa pengendalian kaunseling kelompok.

This course aims to train students to plan and manage group counseling sessions professionally and effectively. The course will focus in enhancing the communication and group leadership skills of students through practical group counseling sessions. Through the combination of theoretical learning in class and experiential learning in actual group counseling sessions, students will be able to determine appropriate strategies and theories to manage emerging issues during the conduct of group counseling.

1. INTRODUCTION

Theses and dissertations of the Faculty of Education, University of Malaya reflect the standards that students need to abide by. As such, the rules and format in this document need to be strictly adhered to.

The guidelines in this document are specifically for the postgraduate students of the Faculty of Education, University of Malaya in the process of preparation of research reports, theses and dissertations. These guidelines follow the American Psychological Association (APA) format.

2. FORMAT

2.1 Binding

A research report/dissertation/thesis submitted shall be bound in one (1) volume. If there is a need for a second volume, special permission must be obtained from the Institute of Graduate Studies.

For the purpose of examination, a research report/dissertation/thesis submitted to the external examiner should be bound in **soft cover** rexine with the colour indicated below:

- Research report: Ocean blue or Light bright blue
- Dissertation: Dark red or maroon
- Thesis: Dark red or maroon

However, for submission to internal reader, student can choose to use simple binding (colour paper and plastic sheet as cover)

For final submission prior to graduation, a research report/dissertation/thesis submitted should be bound in **hard cover** rexine with the colour indicated below:

- Research report: Ocean blue or Light bright blue
- Dissertation: Dark red or maroon
- Thesis: Dark red or maroon

The thesis cover must be of A4 size (210mm x 297mm).

The title of a research report/dissertation/thesis, name of author, name of the university and year of submission must be printed in gold block on the front cover. The letters for the Front Cover should be font size 16, font type Arial Narrow, bold and in uppercase letters.

The examples are shown in Appendices A1 – A5

The spine of a research report/dissertation/thesis should show the title of research, name of author, year of submission and name of degree. The year of submission must be in accordance to the year when the research report/dissertation/thesis is submitted.

The examples are shown in Appendices B1 and B2.

2.2 Length of Thesis / Dissertation

A Research Report / Dissertation / Thesis should generally be in the range as given follows:

- a) Research Report (12 credit hours) : 14,000 - 17,000 words
- b) Research Report (15 credit hours) : 17,000 – 20,000 words
- c) Masters Dissertation (Mixed Mode) (24 credit hours) : 20,000 - 25,000 words
- d) Masters Dissertation (Mixed Mode) (30 credit hours) : 25,000 – 30,000 words
- e) Masters Dissertation (Mixed Mode) (40 credit hours) : 30,000 – 40,000 words
- f) Masters Dissertation (Research Mode) : 40,000 - 60,000 words
- g) PhD Thesis (Mixed Mode) : 60,000 - 80,000 words
- h) PhD Thesis (Research Mode) : 80,000 - 100,000 words

Justification of Word count: The Maximum word count for (f), (g), & (h) do follow the maximum limit of word count set by IPS.

The maximum length of words excludes footnotes, references, appendices, tables, figures and prefaces.

A candidate who wishes to exceed the number of words specified must apply to the Senate through the respective Faculty at least three months before the submission of the research report/dissertation/thesis for examination and provide reasons for the inability to adhere to the prescribed length.

2.3 Paper and Duplication

The research report/dissertation/thesis should be printed, single-sided, on high quality white A4 paper (201 × 297 mm; 80 grams). Computer pin-feed printout paper is not permitted.

The research report/dissertation/thesis, in softcover or hardbound copies, must be typed and duplicated by offset printing or good quality photocopying. All copies must be clean and legible.

2.4 Typing

2.4.1 *Typing Quality*

The research report/dissertation/thesis must be typed using font type **Times New Roman, font size 12** (except for tables and figures) **and justified**, using Microsoft Word version 6.0 or later, or similar word-processing software. Research

report/dissertation/thesis in Arabic should be typed using Font type Traditional Arabic in font size 16.

Words in a language that is different from the language of the research report/dissertation/thesis must be typed in *italics*.

For mathematical texts, the use of Equation Editor or LaTeX is advisable. Script fonts are not permitted.

Text should be typed on one side of a paper only. A high quality laser should be used for the printing.

2.4.2 Spacing

Double-spacing should be used throughout the text, including abstract. Single-spacing should be used for long tables, quotations, footnotes and bibliographic / reference entries.

2.5 Margins

The stipulated margins for the general text are as follows:

Top	: 2.5 cm
Right	: 2.5 cm
Left	: 4.0 cm
Bottom	: 2.5 cm

The following guidelines also need to be followed as far as possible:

- Typing should not extend more than one line below the bottom margin and then only to complete a footnote or the last line of a chapter, subdivision or a caption.
- All tables and figures including their captions should conform to margin requirements.
- A new paragraph at the bottom of a page must have at least two full lines of text or it should begin on the next page.
- There should be **only** double spacing between paragraphs (the start of a paragraph must be indented).

2.6 Pagination

All page numbers are to be placed without punctuation 1.0 cm from the bottom edge at the right hand side. The recommended Font and size for the page numbers are Font type Times New Roman and font size 10.

In addition, the page numbering system must conform to the following rules:

- The *Preliminaries* include the *Title Page*, the *Original Literary Work Declaration*, *Abstracts*, *Acknowledgement*, *Table of Contents*, *List of Tables*, *List of Figures*, *List of Symbols / Abbreviations / Nomenclature* and *List of Appendices*. The *Preliminaries* are numbered in consecutive lower case Roman Numerals (i, ii, iii, iv, etc.)

- **The title page is considered as page i, but the number is not typed.** The Roman numeral ii appears on the first page that follows the title page and continues through for all the *Preliminaries*.
- The whole body of text, the Bibliography / References and the Appendices are numbered consecutively in Arabic numerals (1, 2, 3, etc.) beginning with 1 on the first page of the text.

2.7 Footnotes, Endnotes and Notes

APA does not recommend the use of footnotes and endnotes. Nevertheless, the APA format suggests using footnotes for two types of information: content comments and copyright permission.

2.8 Tables

Tables are useful for presenting a large quantity of information clearly and concisely. They typically display numerical data in columns and rows for easy classification and comparison. Tables do not duplicate text, but rather present information. They should be interpretable without the text.

Basic Presentation and Formatting:

1. Numbering: Each table is preceded by the capitalized word "table" followed by an Arabic number (e.g., Table 1.1, Table 1.2, Table 2.1, Table 2.2 and so on according to the Chapter). The number given to a table is determined by the order in which that table is referred to in the text (i.e., the first table discussed is Table 1.1, the second is Table 1.2, and so on). Capitalize "table," and do not bold or italicize the text.

2. Titling: Each table has a unique title written directly below the table number. Titles should be brief yet descriptive. Capitalize each major word in the title (but not of, on, in, and, etc.). Italicize titles. Don't put a period. Example: Mean Performance Scores of Students with Different College Majors

3. Spacing: Tables in the new 6th edition APA format can be double-spaced or single-spaced with readability as the primary consideration. Spacing should be consistent throughout the table.

4. Ruling: Put lines in a table only when they are necessary for clarity. Horizontal lines are permissible; vertical lines are not.

5. There can be notes for the table

An Example:

Table X.X

Kolmogorov-Smirnov and Shapiro-Wilk Tests for Normality Distribution

Group	Kolmogorov-Smirnov ^a			Shapiro-Wilk		
	Statistic	df	Sig.	Statistic	df	Sig.
Control group	0.094	41	0.200*	0.96	41	0.12
Experimental group	0.106	39	0.200*	0.97	39	0.55

Note. a. Lilliefors Significance Correction

*. This is a lower bound of the true significance.

2.9 Figures

The 6th Edition of the APA Publication Manual gives the following guidance in relation to figures: A good figure:

1. Augments rather than duplicates the text, conveys only essential facts, omits distracting material, and is carefully planned.
2. Be certain in figures of all types that lines are smooth and sharp, units of measure are provided, axes are clearly labeled, and elements within the figure are labeled or explained.

An Example:

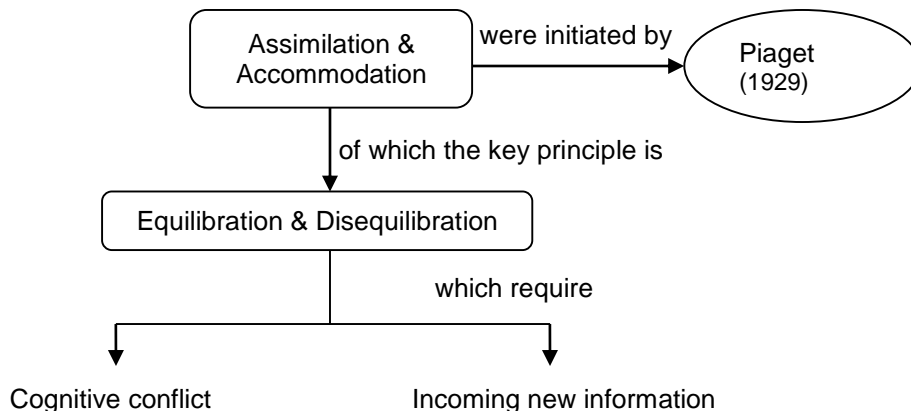

Figure X.X. Outline of Piaget's (1929) thoughts

3 LAYOUT / ARRANGEMENT OF CONTENTS

The structure of the research project, dissertation or thesis is based on a standard format which contains the three main sections; **Preliminary**, **Main Text** and **Supplementary**.

3.1 Preliminary

This section consists in order of the following:

1. *The Title Page* : Appendix D1 – D5
2. *Original Literary Work Declaration Form*: Appendix E1 - E2
3. *(a) Abstract* : Appendix E 3 (a)

(b) *Abstrak* : Appendix E 3 (b)

The abstract should be written as one paragraph, double-spaced and should not be more than 500 words.

A good abstract should consist of brief description of the following:

- (a) Statement of Problem (this includes the gap in literature briefly)
- (b) Objectives of the Study
- (c) Methodology (i.e. research design, sample size, and instruments used)
- (d) Findings
- (e) Conclusion

An Example of a good abstract is shown in: Appendix E3

4. *Acknowledgements* : Most Research Reports / Dissertations / Theses will include a brief statement of thanks in recognition of any assistance.
5. *Table of Contents* : Appendix E 4
6. *List of Figures* : This list should use exactly the same numbers and captions that appear below the figures in the text and the appendices. The numbering system is according to chapter, for e.g.: figures in Chapter 1 are numbered sequentially: Figure 1.1, Figure 1.2 and so on.
7. *List of Tables* : This list should use exactly the same numbers and captions that appear above the tables in the text and the appendices. The numbering system is according to chapter, for e.g.: tables in Chapter 1 are numbered sequentially: Table 1.1, Table 1.2 and so on.
8. *List of Symbols and Abbreviations and Abbreviations* : If necessary to the presentation of the thesis, this list appears after the list of Tables and Figures
9. *List of Appendices* : This list contains the titles of appendices at the end of the research report/ dissertation / thesis

3.2 Main Text

The text is organized into chapters. There is no restriction on the total number of chapters but has to be agreed upon by the supervisor and the candidate. Opinions of the examiners and examination board can be taken into consideration. Generally, the basic structure of the thesis or dissertation is as follows:

1. Chapter 1 : Introduction

This chapter introduces the problem to be investigated and its background; the aim, the research objectives and research questions must be all aligned logically; the operational definitions; the scope of the study and the limitation of the study.

Note: The conceptual and theoretical frameworks can be included here or as seen appropriate in other sections of the thesis.

2. Chapter 2 : Literature Review

A critical review of past literature written by accredited scholars and researchers relevant to the study must be discussed carefully. The candidate can review in depth research conducted as necessary from older publications but must include recent/current publications as well.

3. Chapter 3 : Methodology

The research design and procedures of sampling, data collection and analytical procedures must be explained and described in detail with all the necessary justifications and examples for the chosen approach.

4. Chapter 4: Findings and Discussion

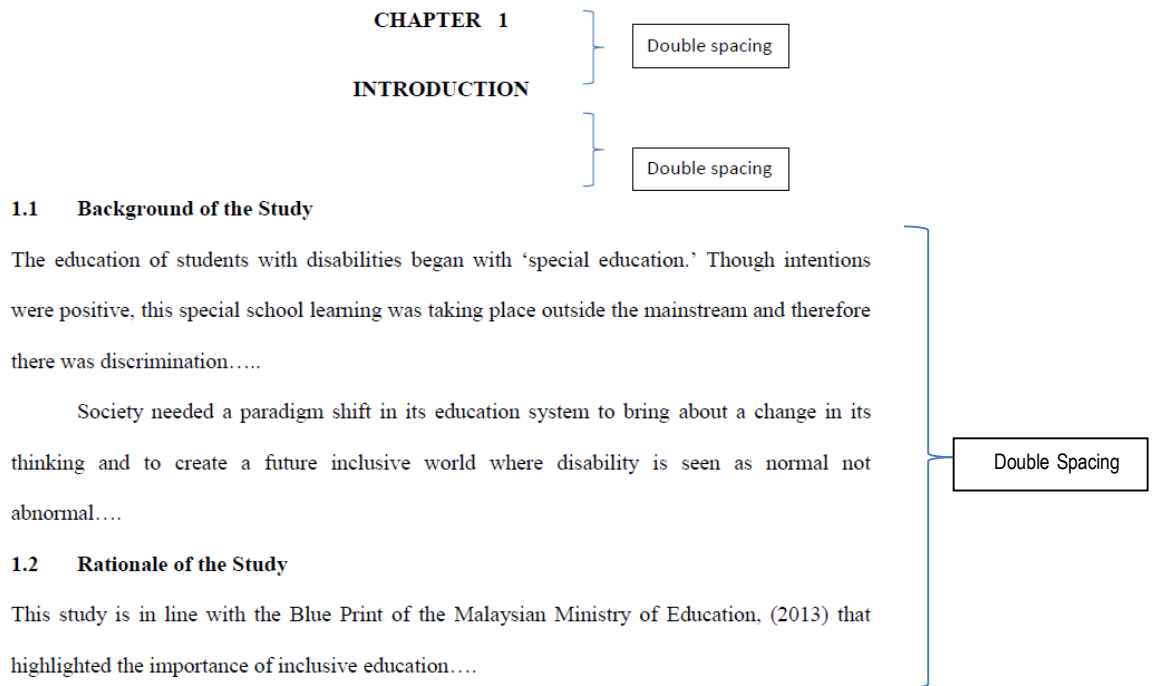

Findings must be presented via the written text, tables and figures and displayed clearly. The interpretation of the findings must be discussed in a scholarly manner.

Note: The candidate may choose to separate Findings & Discussion into different Chapters as seen appropriate.

5. Chapter 5: Discussion and Conclusion

The study findings must be summarized, discussed, the implications, suggestions from the study, suggestions for future research and a conclusion presented.

An example of main text layout is shown as follow:

3.3 Supplementary

This section includes the following:

3.3.1 Table of Content

The following format is only applicable to students' intake from Semester 1, Session 2017/2018.

The Table of Contents lists the chapters, topics and sub-topics together with their page numbers. Sub-topics and topics should be labelled according to the chapter, for example:

Chapter 1: Title

- 1.1 Heading 1
 - 1.1.1 Heading 2
 - 1.1.1.1 Heading 3
 - a. Heading 4
 - i. Heading 5
 - 1.1.2 Heading 6
- 1.2 Heading 7
 -
 -
 -

Chapter 2: Title

- 2.1 Heading 1

3.3.2 Bibliography / References

When citing in the text of the thesis (in-text citations), there are several rules to remember:

1. *Direct quotations (APA Manual, p.170-171)*
In addition to the author and the date, **direct quotations must also include the page number** (or paragraph number for non-paginated sources). For example, (Smith, 2005, p. 27) or for a non-paginated source, such as online material: (Smith, 2008, para. 4). Use the abbreviation pp. for multiple pages.
2. *Paraphrasing*
When paraphrasing, you do not need to include page or paragraph numbers. However, the *APA Manual* states page numbers *may be* included to help your reader locate the material you used in the original source.
3. *Author's name in tag line*
Smith (2009) studied psychomotor ability in football players.
4. *Author's name in parentheses*
Complex psychomotor skills were explored by observing numerous football games

(Smith, 2009).

5. *Two authors*

You need to cite both names every time you refer to a work by two authors. If the names are referred to in the text, only the year appears in parentheses; if the names are not referred to in the text, include the names in the parenthetical reference joined by an ampersand (&).

Smith and Harrison (2007) found a high rate of collaborative learning activity among the participants. A high rate of collaborative learning activity was found among the participants (Smith & Harrison, 2007).

6. *Three, four, or five authors*

You must cite all authors, either in text or parenthetically, the first time they are referenced. From then on, use only the surname of the first author, followed by *et al.* Notice in the following examples that *et al.*, which means "and others," is not italicized and ends with a period.

First time authors referred to in the text: Smith, Harrison, and Nelson (2004) conducted an experiment related to active learning.

Subsequent references to the same authors in the text: Smith et al. (2004) found that the subjects found active learning stimulating.

First time authors referred to in the parenthetical reference: Participants in the study conducted an experiment related to active learning (Smith, Harrison, & Nelson, 2004).

Subsequent parenthetical references to same authors: The subjects in the study found active learning stimulating (Smith et al., 2004).

7. *Six or more authors*

When there are six or more authors, use the last name of the first author followed by *et al.* for the first citation in the text as well as subsequent citations. Follow the same format for the parenthetical reference. Example, Smith et al. (2007)

8. *Secondary sources (APA Manual, p. 178)*

Cite from original sources whenever possible. If you need to cite something that was mentioned or quoted in someone else's work, describe the original work in the text of your paper, but cite the secondary source in your parenthetical reference and in the reference list. An example, if Harrison's work is cited in Smith's work and you did not read Harrison's work, you will mention Harrison's work in the text of your paper, but reference Smith's work, both parenthetically and in the reference list as follows:

Harrison's study (as cited in Smith, 2007)

In this example, Smith's work will be the one listed in your reference list.

9. *Work listed by title*

If no author is given, use the article title (in quotation marks) or book title (italicized) in the text of your paper and in the parenthetical reference. You may use just the first several words, if the title is lengthy. For example, a parenthetical reference to the article "Integrating Technology into Education" which appeared in *New Social Science* without an identified author, can be cited as ("Integrating Technology," 2010).

10. *Personal communications (APA Manual, p.179)*

Personal communications that are not recoverable, such as personal or phone interviews, email messages, and memos are cited in the text only and are not included

in the reference list. (A. M. Smith, personal communication, September 8, 2011)

For more detail referencing style on multiple authors, authors of different ethnicity (e.g. Malay, Chinese, Indian, Punjabi, etc.), please refer to "APA Formatting and Style Guide by the University of Malaya Library" at:

3.3.3 Appendix / Appendices

The Appendix section supports the main written text of the thesis. The Appendices may consist of research instruments, raw data, letters of consent, long results tables, photographs and such. Appendices can be labelled as APPENDIX A, APPENDIX B and so on.

4 MISCELLANEOUS NOTES / GENERAL INFORMATION

4.1 Use of Copyright / Plagiarism

Postgraduate candidate of the University of Malaya are expected to produce original academic work. Plagiarism is defined as the use of original work, ideas or actual texts created by others, without acknowledging the original source. Hence, failure to acknowledge the work of others in their work means the candidate is guilty of plagiarism and may be subjected to disciplinary action under the University of Malaya (Discipline of Students) Rules 1999.

Postgraduate candidates are strongly advised to read the "How to Avoid Plagiarism: A Handbook for Postgraduate Students", which outlines the rules and regulations pertaining to acts of plagiarism.

The University also highly recommends the usage of Turnitin, an online web-based plagiarism detection application to avoid plagiarism and ensure academic integrity. The similarity index percentage should equal to or less than 15% ($\leq 15\%$)

E3 – SAMPLE OF A GOOD ABSTRACT (ENGLISH)

Issues about low problem solving and mathematics performance in Malaysia has led to the need of deep understanding about factors that affecting mathematical problem solving among Malaysian students. This study examined the effects of metacognitive and problem solving strategies training on mathematical problem solving of lower secondary school students in Kuala Lumpur. A quasi-experimental research design was adopted. Three intact classes were randomly assigned into treatment group, comparison group and control group. The total number of participants in all the three groups was 86 where they were pre-tested and post-tested on mathematical problem solving. Prior to inferential testing, preliminary checks were conducted to ensure that there was no violation of the ANCOVA assumptions. After adjusting for mathematical problem solving pre-test scores, ANCOVA results reveal that metacognitive and problem solving strategies training has significant effect on mathematical problem solving, at $p < .05$ level for between the groups [$F(2,82) = 19.635, p = .000, \text{partial eta squared} = .324$]. This result is consistent with the theories. Furthermore, planned contrasts for ANCOVA were conducted using Bonferroni adjusted alpha levels of $.017 (.05/3)$. The finding reveals that problem solving strategies training only has no significant effect on mathematical problem solving. This means that the significant increase in mathematical problem solving is merely due to metacognitive and problem solving strategies training. In addition, the interaction effect of gender is not significant, with $F(2,82) = .047, p > .05$, which suggests that gender did not give effect to the training. Thus, it can be concluded that metacognitive and problem solving strategies training is more effective than problem solving strategies training only; and it is applicable and effective for both gender.
